Comment Type: Observation

Comment: As this bedroom/wet room/ramp extension is being built to suit the tenants specific needs,why is the resulting rearranged kitchen not?

Appliances - cooker/sink/ fridge should be placed in the least hazardous position possible to minimise the potential for injuries.

The user should be able to maintain independence throughout the kitchen to carry out food preparation and cooking safely.The lifting of hot/heavy items from cooker to sink on the proposed plans for a wheelchair user would be hazardous,due to distance across the kitchen.

Is it not possible to place the sink nearer the cooker ?

I&#8217;m very pleased to see our Council is looking after our disabled residents.
