JNP GROUP
CONSULTING ENGINEERS

TECHNICAL NOTE

Job name:	Finchwood Park Parcel 6 (Vistry TV)
JNP Group Job No:	C447**40**
Note No:	C86928-JNP-XX-XX-TN-G-1006 P01
Date:	22/05/2026
Prepared by:	Charlotte Grisby
Subject:	Green Travel Plan

1. Introduction

1.1 JNP Group were instructed by Vistry Thames Valley to create an addendum to a Construction Environmental Management Plan (CEMP) to satisfy conditions set by Highways regarding a Green Travel Plan.

1.2 As part of the wider Finchwood Park development JNP Group have submitted CEMPs and have, to our knowledge, have successfully discharged Planning Condition 43 including any reference to Green Travel Plans. As such, the following technical note includes information outlining the procedures in reference to access, traffic management and construction.

1.3 A Green Travel Plan aims to address the transport needs and demands of both employees and visitors to a site. The plan aims to, where possible, reduce the use of cars and increasing the use of other modes of transportation including public transport.

2. Construction Phase Traffic Generation

2.1 The standard working hours for all operations and ancillary works will be 08:00 – 18:00 Monday to Friday and 08:00 – 13:00 Saturday with no works undertaken on Sundays or Public Bank Holidays. Where works are required to be undertaken outside of these hours, this would be agreed in advance with the Local Authority.

2.2 The accessibility of the development site should be reviewed against the opportunities for walking, cycling, public transport and car sharing. To effectively plan and promote green travel using these transport methods, the number of employees, hours worked and the addresses of staff should be considered. The appointed contractor on site should review this information and promote green travel methods accordingly.

2.3 Construction traffic will access and egress the site via Wheat Street from the A327 or the Nine Mile Ride Extension.

2.4 At this stage the type and number of car parking spaces can only be estimated until the contractor is appointed and the number of construction workers confirmed. It is approximated that parking for seventy-four vehicles will be required on site and will be located in a designated car parking area.

2.5 The proposed site compound layout provided to JNP Group provides a car parking area of 1,225 m^2

with additional overflow parking provided.

2.6 Parking demand is likely to vary throughout the construction phase and as such an additional overflow car park is proposed.

2.7 In an effort to reduce car parking spaces and promote green travel to and from site the following are suggested:

- Clear, safe pedestrian and cycle routes onto site for contractors and visitors;
- Promotion of car sharing where possible to avoid single occupancy travel;
- Promote the use of public transport;
- Minimise the impact of traffic on nearby sensitive locations.

2.8 It is forecast that construction vehicles, including HGVs, will drop off materials to the designated material compound area of craned to specific areas of the site where the materials are required. At this stage, it is anticipated that there will be ten deliveries or HGV movements per day.

3. Traffic Management

3.1 Traffic management onto and around the site is key to that safety of all users, especially pedestrians. The Standard Operating Procedure (SOP) used by Vistry Group (ref: VG-SOP-SHE-37, **Appendix A**), will be implemented on site and formalises the process relating to traffic management to ensure safety and minimise the risk of accident or injury.

3.2 **Appendix B** includes examples of the different signage to be used on site, including those specific to traffic management.

3.3 To ensure the safety of people and plant on site a toolbox talk will be delivered on site, an example of which is included in **Appendix C**.

Document Issue Record

Technical Note No	Rev	Date	Prepared	Reviewed	Approved
TN-G-1006	P01	May 2026	CG	HI	HI

This document is for the sole use and reliance of JNP Group's client and has been prepared in accordance with the scope of the appointment of JNP Group and is subject to the terms of that appointment.

JNP Group accepts no liability for any use of this document other than by its client and only for the purposes for which it has been prepared.

No person other than the client may copy (in whole or in part) or use the contents of this document, without the prior written permission of JNP Group.

Any advice, opinions or recommendations within this document should be read and relied upon only in the context of this document as a whole.

Any comments given within this report are based on the understanding that the proposed works to be undertaken will be as described in the introduction. The information referred to and provided by others and will be assumed to be correct and will not have been checked by JNP Group, JNP Group will not accept any liability or responsibility for any inaccuracy in such information.

Any deviation from the recommendations or conclusions contained in this report should be referred to JNP Group in writing for comment and JNP Group reserve the right to reconsider their recommendations and conclusions contained within. JNP Group will not accept any liability or responsibility for any changes or deviations from the recommendations noted in this report without prior consultation and our full approval.

Appendix A

SHE Standard Operating Procedure - (SOP)

Title:	**Traffic Management**
Document Reference:	VG-SOP-SHE-37
Relevant Standard(s):	GE700 – Section C: General Safety, Sub-section 1: Site organisation. Section F: Specialist activities, Sub-section 1: Street works and road works. Section F: Specialist Activities, Sub-section 6: House building

Purpose

This Standard Operating Procedure (SOP) provides the formal processes and minimum standards required for the company to meet its obligations under The Health and Safety at Work etc. Act 1974, The Environment Act 2021 and comply with the company values of Integrity, Caring and Quality. Compliance with this SOP will benefit our organisation by preventing unplanned events, creating a safe work environment, increase efficiencies and profitability.

Scope

To ensure our site operations teams have access to the information they need to minimise the risk of accident or injury, protect the environment so far as reasonably practicable and maintain optimum standards.

Vistry utilise the CITB GE700 as its operating manual.

This procedure sets out the company's arrangements for traffic management including segregation of plant and people across the Group.

This Standard Operating Procedure (SOP) sets out the specific minimum standards by which Vistry Group, its employees and contracted parties of all tiers are continually tasked with to achieve SHE excellence. All current SOP's and associated policies, forms and guidance notes are available on the Vistry company intranet – Vibe.

Definition: Within this SOP, the term Region represents either a regional office and the sites under their control, a manufacturing facility, or a special projects 'project'.

1.0 STANDARDS

The safety of pedestrians at work and/or others affected by the workplace activities should not be compromised by the movement of vehicles in and around the workplace. Enabling people and plant/vehicles to remain safe whilst moving around site is a key requirement in managing safety on site. The most effective way of ensuring that pedestrians and vehicles move safely around a workplace is to provide separate segregated pedestrian and vehicle traffic routes. Pedestrian routes should include safe crossing points and be:

- Well maintained with, good lighting, free of trip hazards and with suitable and sufficient underfoot conditions
- A suitable width, so that two persons can pass
- Allow pedestrians to get safely to/from their place of work, controlling any interface with moving plant and vehicles.

2.0 PLANNING

The local environmental conditions should be considered when planning the proposed layout for new build structures and office and premises car parks. The effects of and risks from existing or neighbouring highways / roadways including suitable lighting should be assessed and, where reasonably practicable, alterations made to reduce the risks.

The topography of the site/area including gradients, slopes, etc. should be considered during planning to ensure that ground conditions are stable and sufficiently level for the equipment being used.

Where haul roads, or made-up ground are identified an appointed Temporary Works Co-ordinator should be involved to ensure such areas are designed to be suitable for the proposed use. The load-bearing capacity of the ground should be considered for plant and equipment that utilise outriggers or stabilisers e.g., forklift truck. VG-SOP-SHE-36 Temporary Works Management.

Local authorities/highways should be contacted where applicable, at an early stage to agree suitable traffic management schemes and request road closures, diversions, traffic controls, signage etc., as appropriate.

2.1 Practical Measures

The following measures should be considered when planning the proposed layout for new build structures and office and premises car parks or, there is a need to alter existing ones:

- Segregated access points to site for both vehicles and pedestrians
- Traffic routes planned to avoid congestion or risk of collision so far as reasonably practicable
- Vehicle route make up and surface is suitable for the vehicles that will use the route
- One-way systems implemented wherever possible
- Maintenance regime for vehicle and pedestrian routes
- Designated turning points with clear visibility and distanced from pedestrian crossing points, implemented where one-way systems cannot be installed
- Designated parking for delivery / haulage vehicles etc. (consider highway code and avoid obstructing public highways, footpaths bus lanes / stops etc. when pulling into the site / premises)
- Suitable access for delivery vehicles to silo areas along with suitable wheel stops and separate pedestrian access to silo area.

Refer to VG-SOP-SHE-35 Site Set Up. Remaining risks should be recorded within the VG-FM-SHE-002 (CDM) Construction Phase Plan (CPP) / VG-FM-SHE-157 – Traffic Management Plan.

3.0 RISK ASSESSMENT

Persons in charge of managing traffic management activities should consult the SHE Team for guidance and support in the identification of suitable controls measures that should be implemented.

The risks associated with plant and people interface should be assessed for every workplace, including offices and premises, using VG-FM-SHE-072 Risk Assessment Template. An example risk assessment is available on Vibe here.

The risk assessment should include consideration for:

- Pedestrian routes physically segregated (pedestrian barriers for example) from moving plant should be established
- Moving plant encroaching on the edge of an unsuitable roadway / footpath, watercourse e.g., holding pond etc.
- Open excavations where moving plant could fall / tip into
- Overhead power lines
- Loading and storage areas installed to protect pedestrians from entering during loading and unloading
- All round visibility
- Lighting and warnings
- On-site speed is restricted to a maximum of 5 mph.

The provision of physical barriers such as safety banks or stop blocks to restrain vehicles should be used. Where applicable, timber baulks and wheel stops should be fixed in position to avoid displacement.

4.0 TRAFFIC MANAGEMENT PLANS (TMP)

VG-FM-SHE-157 Site Traffic Management Plan should be prepared, communicated and displayed.

The Traffic Management Plan should consider:

- Emergency vehicle access
- Siting of storage areas for specific deliveries
- Siting of re-fuelling areas
- Safe areas for persons to undertake daily safety/pre-use checks on mobile plant.
- One-way systems/turning areas
- Loading/offloading areas
- Parking.

The TMP should be reviewed regularly (daily on building sites) and updated where applicable, to reflect the current conditions on site, considering any changes in work build programmes, additional / unplanned works activities or changes to layout that may have a negative impact on the level of risk.

4.1 Contractors and Suppliers

The TMP should be discussed/explained during pre-start meetings (VG-FM-SHE-091 Subcontractor Pre-start Meeting Minutes) and during site specific inductions to ensure that contractors are allowed to review and comment in the event of changes required to suit their operations and/or mobile plant being used as part of their works.

5.0 GATEPERSON

A competent person, with all mandatory training as defined on the Vistry SHE Training Matrix must be appointed as Gateperson to control the access and egress to site. A risk assessment should be developed for this activity using VG-FM-SHE-072 Risk Assessment template. An example Gateperson risk assessment is available on Vibe here.

Where the provision of a Gateperson is not deemed necessary, a risk assessment must be completed which identifies the specific controls measures to prevent unauthorised access at all times. This must be signed by the Regional MD.

6.0 BANKSMAN / TRAFFIC CONTROLLER

A competent person (CPCS/NPORS or other suitable training depending on risk level) should be appointed as a traffic banksman / traffic controller to ensure the safety of all people when moving plant is reversing, or operating in sensitive areas, for example occupied areas. A risk assessment should be developed for this activity using VG-FM-SHE-072 Risk Assessment Template. An example traffic banksman risk assessment is available on Vibe here.

A competent traffic banksman / traffic controller should assist drivers when materials are being tipped or unloaded.

7.0 CROSSING POINTS

Pedestrian crossing points should be established at prominent locations throughout the site / area, clearly demarcated with red crossing hoops (with gates in high-risk locations) and wherever possible the ground marked up with black & white zebra crossing paint.

8.0 THUMBS UP & PLANT SAFETY ZONES

Vistry Group operate the universal sign language 'thumbs up' across all developments. The regime involves pedestrians giving the plant operator a thumbs up sign, asking permission to enter their work zone. The operator returns the thumbs up sign in recognition and to authorise the request.

To assist sites in communicating plant safety zones, a number of posters are available on Vibe here. The posters can also be ordered form the Group signage supplier Glendining. Sub-Contractor RAMS should include details of plant safety zones and how to safely approach plant.

9.0 OFF-SITE HIGHWAY / STREET WORKS

Where any mobile plant is to be traversed along/across the public highway, a specific risk assessment is required. This should be considered a high-risk operation.

Where the work includes highways/street works, the Sub-contract must appoint a competent Supervisor to agree the traffic management scheme and safety zones and to monitor the scheme during the deployment, the actual works and after it has been removed.

10.0 SPOIL HEAPS

Dumpers are **not permitted** drive up spoil heaps / mounds of waste soil etc.

11.0 CAR PARKS

Car parks provided for use by employees, Sub-Contractors, visitors etc. must be safe for use. A risk assessment should be carried out and should consider:

- Safe access for pedestrians from the car park to the site / building
- One-way systems where possible
- Lighting and signage
- Non-slip surfaces (suitable material should be laid during extreme icy weather)
- Appropriate speed limits.

RACI Matrix

The following RACI matrices detail key activities which must be undertaken to meet the requirements of the SOP. Separate RACI's are provided for both Developments and Contracting. The following requirements apply:

- **R**: This is the person or team **R**esponsible for completing the activity
- **A**: This is the person or team who is **A**ccountable for ensuring the activity is completed
- **C**: This person or team should be **C**onsulted in relation to the activity (2-way communication)
- **I**: This person or team should be kept **I**nformed of progress (1-way communication).

Responsibilities Matrix

R= Responsible **A**= Accountable **C**= Consulted **I**= Informed

		Regional Managing Director	Regional Construction Lead	Contracts Management	Site/Project Lead	Regional Pre-Construction Lead	Regional Design Lead	Regional Technical Lead	Regional Commercial Lead	Land Lead *(Strategic or Region)*	Regional Sales Lead	People Team	Regional Customer Services Lead	SHE Team	Regional Premises Manager	Contractor/Consultant	Manufacturing
Stage 1 Planning	Pre-construction, traffic management arrangements to be considered including vehicle access to site, compound/storage locations and haul roads on site including temporary if needed	A	C	C	C	R	I	R	I					C			
	Traffic management risk assessment undertaken using VG-FM-SHE-072	A	I	C	R	C	I	C	I					C			R
	Traffic Management arrangements details in CPP VG-FM-SHE-002 / TM Plan VG-FM-SHE-157	I	A	R	C	C	I	C	I					C			
	Traffic Management Plan communicated at contractor pre-start meetings	A	C	C	C	C	R	C	R					C		I	R
Stage 2 Operational	Traffic Management Plan developed, displayed and updated on a daily basis			A	R	C		C								I	
	Control measures from risk assessment established on site and maintained	A		C	R											I	R
	Traffic Management arrangements communicated to workforce at induction stage	A		C	R											I	R
	Any plant movements within occupied/public areas specifically risk assessed			A	R									C			
	For any highways/street works, competent supervisor will be provided by the Sub-Contractor			I	A									C		R	
	Appoint Gateman and undertake risk assessment using VG-FM-SHE-072	A	I	C	R				C					C			
	Where required, appoint traffic banksmen and undertake risk assessment using VG-FM-SHE-072	A	I	C	R				C					C			R
END	Review documentation in line with this SOP. Continue SHE Monitoring	**All Affected Parties**															

Notes:

Where a role states 'Lead', this is referring to the most senior person within that function. They can delegate activities to others within their team.

Contracts Management refers to the person who the Site/Project Lead reports to. Job titles could be Area Build Manager/Director, Contracts Manager or Production Director.

Contractor/Consultant covers external Principal Contractors, Sub-Contractors, Designers, Consultants and Suppliers.

Where there is any ambiguity on who is undertaking which role, the BU MD must decide on the most appropriate person. The Regional MD holds the ultimate accountability for SHE within the Region.

Construction phase roles are to be identified in the VG-FM-SHE-002 CPP and/or VG-FM-SHE-117 Appointment of Site Responsibilities

Signs supplied by

GLENDINING SIGNS

Tel: 0118 932 3788 Email: sales@glendining.co.uk Web: www.glendining.co.uk

Welcome

About Us

Glendining Signs are one of the UK's largest sign makers, leading the Construction Signage Industry using the latest large format printers and technology to produce high-quality printed signs for many of the UK's biggest housebuilders. With over 40 years in the industry, Glendining Signs has built a reputation for service and reliability, helping our valued customers meet their strict deadlines time and time again.

Quick and easy ordering

Contact our sales team to place your order:
Phone: 0118 932 3788 Email: sales@glendining.co.uk
Opening times: Monday to Friday 8.30am to 5.00pm (ex. Bank Holidays)

Fast delivery

Standard Delivery
Mainland UK FREE
Other UK destinations: N. Ireland £45.00, Scot. Highlands £50.00, Isle of Wight £30.00, Offshore Islands £60.00

We reserve the right to charge carriage at cost for heavy/non-standard items.

Non-standard Delivery

If your delivery destination:

- is of high security;
- is not continuously occupied;
- has any special signing in procedures in place;

Please let a member of our sales team know in advance of placing your order as we may need to look at alternative delivery options and quote accordingly.

Deliveries are carried out on our behalf by several third-party carriers. We will select the best option available based upon the size of goods, weight and delivery destination. This service comes by way of carrier networks and deliveries can be made at any time between 7am and 6pm. As the service we offer is multi-drop, we may not always be able to provide driver details or vehicle registrations in advance as routes can be changed at short notice. Drivers may not make a delivery if being asked to report to more than one location, or are being held for security checks/inductions, or placed in queues for more than a few minutes. If drivers must make more than one attempt to deliver, each delivery attempt may be chargeable.

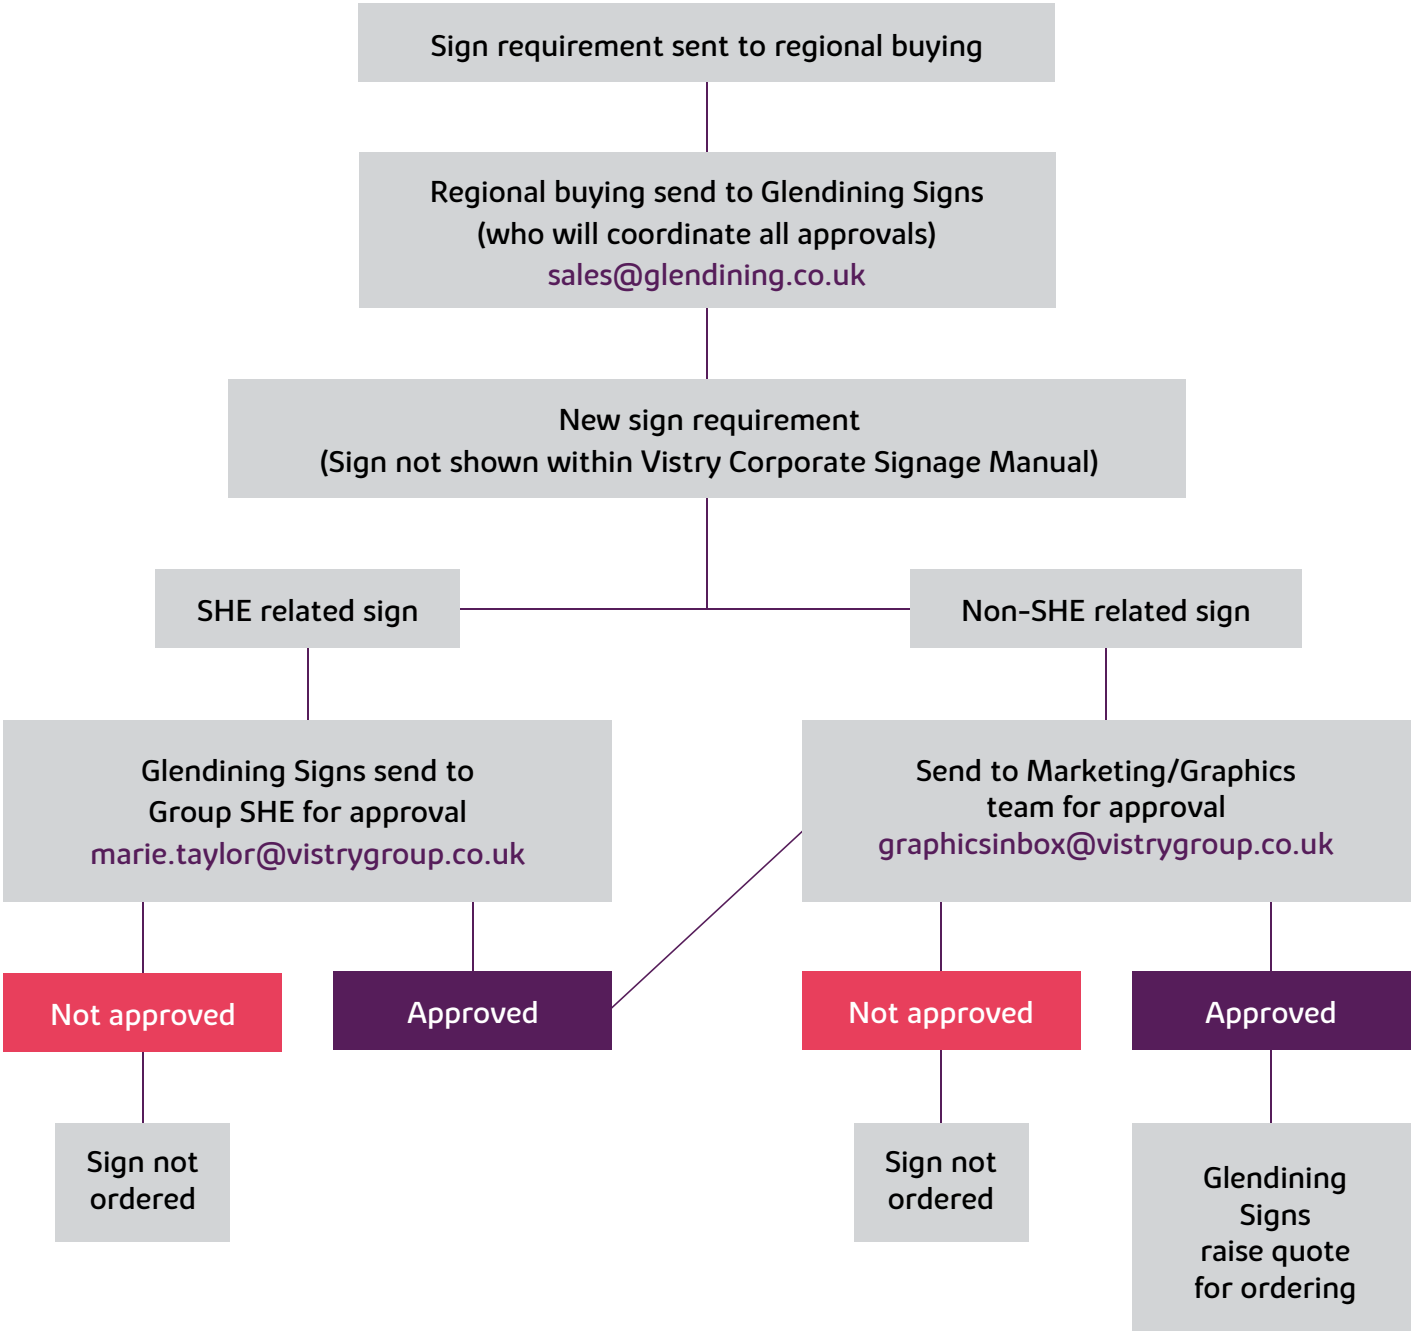
Bespoke Signs Approval Process / SHE

When raising a requisition or order for signage, please ensure you select the required branding for your project.



Hoarding

44

Hoarding will be painted in neutral grey. A Countryside Partnerships branded panel and retail brands panel will be available. These can be used to brand the hoarding dependent what is being built on the site.

Examples

› Where a site is building retail only, use sign VG-SPEC59.

› Where a site is building retail and in partnership, use signs VG-SPEC59 and VG-SPEC60.

› Where a site is building in partnership only, use sign VG-SPEC60.

Other Information

a. Every effort has been made to ensure that the information we supply is correct.

b. No guarantee is given or implied that the goods will conform in absolute detail to the description and illustrations.

c. We reserve the right to amend specification in line with our policy of continuing product improvement. Prices are subject to variation without notice, although every effort will be made to maintain prices stated.

d. We supply goods strictly on a 'retention of title' basis, i.e. title of goods does not pass until they have been paid for in full with cleared funds.

e. Customers without credit accounts must pay the total purchase price on placing the order. Payment may be made by purchasing, debit or credit card.

f. We may agree to you opening a credit account, subject to satisfactory completion of a Credit Account Application Form, and subsequent reference approval.

g. You must pay our invoices within 30 days of invoice date, or we may close your credit account, cancel or suspend any further deliveries, and charge interest on late payments plus our costs in attempting to recover payment, in accordance with the Late Payment of Commercial Debts (Interest) Act 1998.

h. We do not operate settlement discounts, and all quoted prices are net.

i. We have no minimum order charge; however orders with a net value, before carriage and V.A.T of less than £30.00, will be subject to an administration charge of £7.50. There will be no administration charge for prepaid orders, or for orders paid by credit card.

j. All items that we sell are subject to V.A.T.

k. Orders are dispatched complete whenever possible, but in the event of shortages, part shipment will be made in the absence of instructions to the contrary.

l. Unless otherwise stated, carriage and packing is charged on each delivery at a rate of £9.75 for mainland England, £50.00 for Scottish Highlands and by prior agreement for offshore islands.

m. We reserve the right to charge carriage at cost for heavy items.

n. All goods are dispatched by the quickest practicable method.

o. Special delivery arrangements will be quoted if required.

p. If you purchase standard* items online but change your mind, under the Consumer Contracts Regulations 2013, you are entitled to a full refund (via the original payment method) provided you notify us in writing within 14 days of receipt that you wish to cancel your order. Notification can be made via post or email to Glendining Signs Ltd. A1 Access Twelve, Station Road, Theale, Reading, Berkshire RG7 4PN or accounts@glendining.co.uk. Once we receive your request to cancel your order we will respond in writing (this may be via email) to confirm and detail your claim and give further instructions. You will be required to return the unwanted goods at your own cost, packed in such a way that they remain in their original condition within 14 days of confirmation of your cancellation claim. Any damage or degradation of product from its original condition may reduce any amount refunded to you. Refunds will be made by the same method as payment and will be refunded back to the original source of payment. Refunds will be made within 14 days of receipt of returned goods. If any of your items arrive damaged, faulty or incorrect you must notify us at your earliest convenience to enable us to rectify the situation. You can call us on 0118 932 3788. If a package arrives to you clearly damaged, please refuse delivery or at the very least sign for it as "damaged". Once we have been notified of any problems we will begin an internal investigation. We will often request that you email photos of the problem if possible as this speeds up the process. Once your claim has been validated we will do our very best to rectify the situation as soon as possible by whatever means necessary.

q. No part of our catalogues, web sites or literature, may be copied, stored on any type of retrieval system, or reproduced by any method.

r. The "Copyright Designs & Patents Act 1988" will apply and be enforced for all designs originally from this company and all designs interpreted from customer specifications.

s. The placing of an order implies acceptance of our terms of business.

t. In any situation where your terms of business conflict with ours, our terms will prevail.

u. Unless otherwise stated the expected service life of all products sold by Glendining Signs Ltd. shall not exceed 3 years.

v. The expected service life of products may be reduced if said products are subject to negative environmental factors or are installed or maintained incorrectly. Glendining Signs Ltd will not be held responsible for damage, loss or injury caused by incorrect fitting or poor maintenance of any products supplied.

w. To cover additional design/proof costs involved, all non-English language or bi-lingual signage will incur a surcharge. This will be chargeable per design. This additional cost will be quoted at the time of placing the order. Non-English language or bi-lingual signage can only be supplied if suitable translations are provided. Should an order of this nature be cancelled or amended to reduce the number of designs after initial design/proof work has taken place you are still liable to pay the original surcharge amount in full. Should an order of this nature be amended to increase the number of designs after initial design/proof work has taken place the surcharge amount will be increased accordingly. Glendining Signs Ltd will not be held responsible for the accuracy of translations provided by customer.

x. Where consent has been given by the individual, the Company may make contact with information regarding signage, other related products, special offers or competitions that it feels are in the legitimate interest of the customer. Consent may be withdrawn at any time by the individual by emailing info@glendining.co.uk with the subject UNSUBSCRIBE. Future marketing preferences will be altered and recorded as requested following receipt of this notification. Data subjects may also exercise their right to be forgotten under the General Data Protection Regulation by emailing info@glendining.co.uk with the subject FORGET ME. In this case all personal data stored regarding that data subject will be erased unless its retention is required to satisfy a legal obligation of the Company. Where a retention period is mandatory by law (such as to comply with the Companies Act 2006) the right to be forgotten will be acknowledged and recorded, and the data erased after said period expires. Notification of actions will be sent to the data subject.

* Under the Consumer Contracts Regulations 2013 goods that are bespoke or custom made to your specifications are exempt as by definition they cannot be re-sold. These bespoke items therefore do not qualify for the 14 day cooling off period. Items of this type may only be refunded or replaced if they have been supplied incorrectly or are faulty or damaged.

SHE Toolbox Talk – People & Plant Interface

What do we mean by people and plant interface?
This means how people and moving construction vehicles interact with each other on site. When people and vehicles collide, the consequence can be serious injury or death.

Does anyone know of some recent accidents involving people being hit by plant?
Across the construction industry, on average 7 people a year are killed by moving plant/vehicles. Across Vistry sites over the last 2 years, there has been 20 recorded incidents involving people being struck by moving plant. 9 of these incidents resulted in injuries ranging from multiple leg fractures, a fractured arm, a broken hip, and head injuries.

The trades involved in these accidents varied from groundworkers, to bricklayers and even plant operators themselves! All of these accidents could have been avoided and all of them could have resulted in a potential fatality.

Every major accident involving plant and people has two things in common:

1) The person involved was standing very close to the moving plant
2) The operator did not see that person before manoeuvring the plant.

What do you think could be done to make areas with moving plant safer?

- ✓ Segregate plant and people
- ✓ Erect physical barriers
- ✓ Install and use designated walkways and crossing points
- ✓ Display warning signage
- ✓ Wear high visibility clothing
- ✓ Ensure reversing alarms are activated and working
- ✓ Good vision for plant operators
- ✓ Competent plant operators
- ✓ And awareness of the risks for everyone on site.

Operatives who are required to work near moving plant must:
'Get the Thumbs Up!' from the Plant Operator before approaching or entering the exclusion zone of moving plant and make sure you give the thumbs up back.

What is the meaning of 'Thumbs Up'?
This means waiting at a safe distance from the plant until the operator has seen you and given you the thumbs up to pass or approach the plant.

"Do not approach unless the machine is disabled, and you receive a thumbs up from the operator."

When approaching construction plant:

STOP: at a safe distance

SIGNAL: thumbs up the plant operator and await their thumbs up response

MANOEUVRE: with care at all times.

SHE Toolbox Talk – People & Plant Interface

Remain vigilant at all times. Never put yourself in a situation where you are at risk from being crushed or struck by a vehicle. If you ever feel you are at risk – Stop what you are doing and report it to your supervisor.

What would your family say to you if they saw you standing too close to a working machine?

Would you feel confident in giving feedback about the suitability of people/plant segregation on site?
We want you to feel comfortable in reporting any concerns you have to your supervisor or site management. No one will get into any trouble for reporting unsafe conditions or behaviours and you might save someone's live!

Reporting Near Misses
Any near misses involving construction plant should be reported as soon as possible to your Supervisor and Site Management. This will allow the near miss to be investigated with the aim of preventing a similar reoccurrence in the future which could result in injury.

Vistry Group Speak Up Reporting Hotline
If you ever feel traffic management standards on site are not being managed well and no action is being taken following reports to Site Management of unsafe conditions or near misses, you can report this confidentially on the Vistry Group Speak Up reporting hotline: 0800 069 8071.

If in doubt, always report anything you believe to be an unsafe condition, act or near miss to Vistry Site Management
