COMMENTS:

Please can the plan provide details of drainage works or other details that define how domestic waste water(sewage) will connect to the main sewer. There are no details covering a cesspool or septic tank drainage systems installation and hence it is assumed in the application that this will not be installed with the obvious impact that the drainage fields/mounds would have on surrounding properties and watercourses, that are already at the point of saturation and subject to flooding. No formal or informal approach has been made to Bonhomie Court (nearest neighbour), and hence reassurance is requested that a septic tank installation is NOT being considered in this case.
