Chair and members of the planning committee.

I strongly object to the planning application 250563, brick wall to the front of no. 2 Larch Avenue, on the following points.

The ground for the proposed brick wall is on land not owned by the applicant/property owner. It is the grass verge bordering the road and is therefore part of the road.

No 2's property boundary is the wooden fence shown in the photographs.

The covenant covering the road has already been contravened by the front extension of the building.

I respectfully request that this planning application is turned down and the grass verge/road reinstated to its original condition.

Yours sincerely

Tong Kalisz
