COMMENTS:

I am writing to express my strong objection to the proposed development. As a resident of Woodley, I am already frustrated with the long waits and queues at local doctors' surgeries and chemists. The addition of new homes in Hurst will only exacerbate this issue, as Woodley is the nearest area with essential services and shops. More houses mean more people needing medical and retail services, which will put further strain on our already stretched resources. We are struggling to manage the current demand, and this development will only make matters worse.

I urge you to reconsider the impact this development will have on our local services and quality of life.
