COMMENTS:

My concerns are mainly around the suitability of the location, access in and out is already a problem as the Reading Road is already increasingly busy with all the new housing going in. Parking at the site there is already cars parked along the roads around Halfords during the work day so this will only be exacerbated with the proposed number of parking spaces nowhere near enough from the comments of support for the project.

Noise: in the interest of community adhesion if the project is to go ahead, there should be an agreement to no call to prayer announcements. This would be a nuisance to locals.

In the interest of diversity and inclusion in the local community, this space would be more suited to services that serve the community as a whole. Doctors surgeries, robust recycling centres and NHS dentists would be a far better use of the space and provide better infrastructure for all the new residents.
