COMMENTS:

I object to the felling of this laurel tree & also please note including any further trees behind this tree on church land. My reasons are due to the substantial removal of various trees already on this plot including a beautiful majestic fir tree, many apple trees, an elderflower tree, and a whole line of holly and other various mixed trees. I have also been subjected to trimming of trees on my land without permission. Also the hedgrow opposite has been interfered with & several trees being cut down on church land. It is such a shame that what used to be a beautiful natural country lane has been reduced to a suburban type environment with all the natural habitat being destroyed. I would also like it noted that the total removal of the trees in the front garden boundary has caused flooding down the public footpath that now flows all the way down the footpath down to Lower cottages driveway then down to White Horse Lane causing erosion. This constant removal of vegetation seems to be now getting slightly obsessive only to be sadly replaced by huge log stores and various piles of brickabrac & also exposed the previously hidden telegraph poles. The TOP was placed on this land for a very good reason & I fear granting permission will then encourage further removals.
