PLANTING NOTES

- Shrub beds topsoiled to a depth of 300mm, turfed areas to a depth of 100mm.
- All planting to be in accordance with the DWH specification for soft landscaping.
- No species, varieties, sizes or positions to be amended without the Landscape Architects prior approval.
- Before trees are planted, the Landscape Contractor shall ascertain the location of drains from the Site Manager, and shall if necessary make minor adjustments to tree positions to ensure that they are planted at least 1.5m from drains. They should however be planted no closer to houses/garages than is shown on the drawing, and if shown located in shrub beds, the shape of the latter should be adjusted if necessary to accommodate the revised tree position.
- All planting to be mulched as specification.
- If planting is required outside the October-March season, bare rooted shrubs will be replaced with 3L pot grown plants, and trees will be planted as 1.8-2.1m, 10-12L containerised plants.
