COMMENTS:

I fully support this application as it would be a fantastic addition to our diverse community. A local mosque would provide a much-needed place of worship within walking distance for many residents, making it more accessible for families, the elderly, and those without cars.

This would also help ease traffic congestion in other areas of Wokingham Borough. Having a place of worship nearby, as many other faith communities do, would be a wonderful way to support local residents and foster a more inclusive and connected community.
