

Landscape details.

Wade Day Centre is set within lovely well-maintained grounds – see images below.

The proposed extension will create a larger office area for the admin staff, and a larger dining room area for residents. Externally the extension is located over part of the existing hard paved area – see image below. It is not considered necessary to extend the patio area further, therefore the extensive lawn and existing planting areas will remain.

Given the extent of existing planting, trees, shrubs, we do not consider that there is any need to create additional landscaping.

Rear of centre providing lovely landscaped gardens for residents to enjoy.
