COMMENTS:

The structure is excessively high and built very close to my property, significantly blocking sunlight in my garden and creating an enclosed, claustrophobic feel. One of the key reasons we purchased our home and paid a premium was its south-facing garden, which is now partially shaded by this construction. This not only affects our enjoyment of the space but could also impact the property's market value.

Moreover, we were given no prior notice of this build and only became aware as it took shape, making the situation even more frustrating. In addition, the finishes on the side facing our house are extremely unpleasant, further diminishing the aesthetic and overall enjoyment of our property.

I would appreciate it if the council could review this matter to determine whether the construction complies with local planning regulations and consider any necessary adjustments to reduce its impact.
