Dear Sir

Heritage Statement

Proposed site of EV Charger and Tesla Powerwall Battery

Our house is a grade 2 listed building with a hipped slate roof and a square plan dating from circa 1840's. The proposed EV Charger and Battery are not attached to the building and will be in the driveway opposite the building on an existing wall.

The addition of the EV Charger and battery will add to the energy efficiency of the building and will have no impact on the building itself.

Many thanks

Yours Faithfully

Paul King
