: Charvil, Reading, Berkshire  
: RG10 9DW  
SUBMITTED BY : Mrs Nicola Weakford  
DATE SUBMITTED : 12/12/2025

COMMENTS:

I believe this is a totally ludicrous proposal. This site is just metres away from the most beautiful Lakes and wildlife habitats where birds nest. Diesel / kerosene contamination would devastate this area; the park, lakes, fish stocks and protected species including otters & bats. It is such a quiet, tranquil area and this fuel depot would significantly harm the quiet character and enjoyment of the Park. In addition the old bath road where this site is situated not only a narrow bending road but is also on a school route to both Charvil Primary and Piggott Secondary, Wargrave. As a local parent I strongly believe that the significant increase in HGV journeys is a serious risk to children walking to school on foot and on their bikes. In summary, this location is totally inappropriate from an environmental, public safety and loss of peace / tranquility perspective.
