COMMENTS:

There are two points that we wish to be considered:

1. We have concerns that the dormer windows of the 2nd floor loft conversion will overlook our ground floor room and gardens resulting in loss of privacy. Most houses in these roads have Velux windows for the loft conversions.
2. The pitch roof of the ground floor rear extension will result in loss of light to our rear ground floor room and patio. Consideration of a reduced height pitch or a flat roof would minimise this impact

.
