COMMENTS:

This is a veiled attempt to change the access to this site to support a new road that will open development to the previously public fields behind. This, and all future attempts for planning applications must be declined. I cite my previous reasons. Increased hazard on the barkham road (a double blind bend), no actual value in adding rooms or facilities to the pub itself, and the genuine attempt to circumvent the council's own policy on development between the barkham and wokigham boundary. This should be rejected, and the land behind the pub should be formally considered for right to access.
