

L&T Statement of Building Use

The building, 1-3 Reading Road, Eversley RG27 0RP will be used for the operation of a Patient Transport Service. The building will be used as offices for the company and the car park will facilitate staff parking and company vehicle parking. Although we are a 24/7 company, only company vehicles will be left on site overnight. Steps have been taken to ensure the least disruption to the neighbouring residents.

There will be no material change to the existing floor plan of the building and an extension to the parking area will provide five extra parking spaces for the company vehicles. We propose to use a product that will allow for the grass to grow as well as providing a secure standing for the vehicles. We will also be planting additional hedgerow along the border between the site and the immediate neighbouring property.
