COMMENTS:

- Not enough infrastructure to accommodate more houses and people in this small village - not enough capacity in our doctors, schools, shops, sewage system, roads.

- Would negatively impact our strong biodiversity ie deer

-We already have a large number houses being built in the village which most people objected against.

- Significantly more light and noise pollution

-Already cars parking in the side of the roads which is dangerous, by building more houses this will only increase

-Overall most people completely disagree with this, we have all chose to live in a small village for a reason - I have recently moved from wokingham town and seen the negative impact of mass housing and traffic, we do not want this in swallowfield either.
