COMMENTS:
The fencing on the road is not visually intrusive, blends in well (being dark against a dark building) and is partially screened by trees. I'm surprised that the fencing along the bridleway even needs permission as there is no vehicular movement allowedthere, as far as I know, and so a 1.8m fence would normally be allowed. But the same points apply, the fencing is partly screened and is not visually intrusive. I would like to see the fencing approved.
