COMMENTS:

I am writing to formally object to the prior approval application for the installation of the monopole.

As a very close residential neighbour, I have serious concerns regarding the scale, siting, and impact of this proposal on the immediate area.

The size of the monopole and antennas would result in a visually dominant and intrusive structure. This is significantly out of keeping with the character of the surrounding residential environment and would have a harmful impact on how the small town will look.

I am also concerned about the potential impact on residential amenity, including perceived health implications, noise from equipment, and general disturbance associated with the installation and maintenance of the site. While I understand that such developments must comply with guidelines, the closeness to homes makes this an unsuitable location.

In addition, there appear to be limited details regarding alternative siting options. It is not clear that sufficient consideration has been given to less intrusive locations that would reduce the impact on residents.

Given the above concerns, I respectfully urge the council to refuse approval for this application.

Yours faithfully,
Susan Twose
