COMMENTS:

I believe this is such a stupid thing to allow to happen on this site as someone who walks
The lakes around the area most days (dog walk) over the past 20 years. I have seen the flashes Flooding that has occurred over the past years and it completely covered the old prince brothers site. To have something like this is a huge risk to our environment we have meny local fishing lakes and rivers and nature reserves within 10m off the site under no circumstance can I see a way to be able to make 800,000l off fule safe to be stored in this area no amount off bonding and spill kits can hold back a flash flood like I have witnessed in past years . Also has anyone considered the will be a strong smell off fuel witch also effects the environment and the road is not suitable with the increase in amount of traffic flow the village is now encountering

Please reconsider a different location for speedy fuels

As a member off the local community I object to speedy fuels to be built on the old Prince brothers site

Please get a more suitable location
