COMMENTS:

The A3032 Old Bath Road leading to and from Twyford is totally unsuitable for heavy goods vehicles, including oil/fuel tankers. The road has bends that make visibility very hazardous especially when vehicles are parked. HGVs are constantly obstructing the highway while waiting to enter this very small industrial area. The additional vehicle movements will only add to the delays and danger already present.

The storage of 800,000 litres of fuel oil in such a close proximity to a nature reserve, lakes and rivers poses an environmental threat. Any spillage either large or small will have a detrimental environmental effect on wildlife habitats and water quality. I strongly object to this planning application on the reasons given above and fully support the local community in opposing such a development.
