COMMENTS:

I again write to firmly oppose this development on the grounds of environmental and ecological risk to the lakes and countryside which is in close proximity. It is ludicrous that the developer can suggest such a storage facility so poorly accessed off a narrow, busy and winding road. In particular, the storage of many thousands of litres of oil so close to a population centre and the inevitable leakage of fumes, poisonous and flammable products into the environment risks destruction of the local biodiversity of the lakeland that borders it. The Local Authority should be very sure that such an accident would not result in legal action that would result as a consequence of granting this application. Frankly it is totally bizarre as a suggestion.
