COMMENTS:

This development on its own is not the issue if the link road to the lower Earley way is not built but together with the our hall farm application it represents a huge number of extra vehicles trying to access the A329m/m4 and access local towns and the roads that will link up, are already some of the worst for delays in the area. Unless the road system that it will attach to is significantly upgraded it would put a huge strain on the many people who have to endure very long commute times currently.
