COMMENTS:

I am strongly opposed to the fuel depot because of the serious risks it poses to Charvil/Twyford community and the surrounding environment. This site is directly next to our homes, as well as sensitive wildlife habitat and local water bodies, streams, rivers and lakes. This depot brings the risk of pollution, hazardous spills, increased noise, traffic, and reduced air quality all of which could harm local families, wildlife, and ecosystems. I believe this development is completely unsuitable for the type and nature of this area, and I urge decision-makers to make the right decision and protect the wellbeing of residents and the natural environment we depend on. We do after all pay significant taxes and rates for this area in its current form
