COMMENTS:

I live very close to White Cottage and walk past it most days. I've watched the Hills look after that place with real care, they're always working on something, keeping it tidy, and they're the first to say hello when you pass the gate.

I've had a look at the plans and honestly, they seem very reasonable. Nothing about it feels out of place or over the top. It looks like they're trying to make the home work better for their family without changing what makes the cottage special. Given how many people visit them and how involved they are in the community, the improvements will actually make things calmer and more organised, not busier or disruptive.

Living so close, I'm probably one of the first who would notice if anything was a problem, and I don't have any concerns. The cottage will look the same from the outside, just more practical on the inside. I'm happy to support the application. Regards
