COMMENTS:

I object this planning development.

As a Hurst resident for over 24 years, I have seen this field water logged a number of times with puddles building up on tape lane occasionally flooding like this spring 2024.

I am very worried with flood risk increase in Hurst with loss of this wet field

replaced by large build up areas.

Hurst has a rural character and this suburban development is not in keeping with the area.

Previous application for 200 dwelling was rejected as land not suitable for house development.

I do not see why this same land should be now suitable a few years later.

We are too far walking daily to and from supermarkets, train station, surgery, and secondary schools. Using a car is not an option in Hurst.

99 houses will bring at least 200 more cars, I do not see enough parking spaces let alone for the resident and will be a mayhem with visitors. the B road is fast and the access will be dangerous. 99 houses will bring some 400 people into the village.

The infrastructure is limited and not suitable for such an increase.
