COMMENTS:

Please note that the ground floor bathroom window on the garage side is not suitable because this wall is the boundary of the house. This window would open straight onto our land which is a privacy concern. Also, the guttering for the new pitched roof on the garage side needs to be redesigned to fit within the neighbours land and not overhang onto our land. Therefore, the overhanging gutter proposed on this side is not suitable and the neighbour can consider an alternative. If the garage wall will be demolished then it needs to be rebuilt in the same position so it doesn't encroach onto our land. Apart from this we wish the neighbours good luck with their work.
