Guidance Notes for the Completion of the Parking Demand Calculation SpreadSheet

Background

Standards for residential dwellings form a large part of parking within the Borough. More basic methods of parking allocation have not previously been successful in providing efficient and effective provision for parking at people's homes. In particular, the way parking is provided has a significant effect on how much parking is required. The following parking allocations provide a flexible, more formulaic, approach showing how the number of spaces varies depending on if these are allocated to a specific dwelling or unallocated for use by multiple dwellings. The allocation changes based on accessibility and the character of the area, this has been split into 3 categories: Urban, Town and Fringe and Village. A map showing the classification of each ward is given in the Map tab. The allocations are based on real empirical data of car ownership in Wokingham, more information on how these allocations were formulated can be found in the technical parking report.

This spreadsheet tool is provided as a guide to the production of initial parking demand for residential developments across Wokingham Borough Council

This tool is based on the parking demand technical report produced for WBC Technical Services Team by WSP and a copy of this report and its findings can be located on the Council's website.

Other than this notes sheet, only the *"Interactive fill in sheet"* should be used. All other work tabs are hidden and protected.

Using the Interactive sheet

The sheet is designed to be completed by the user on the basis of some forward thought of the the development proposals including types and number so dwellings, ownership and initial thoughts on allocation of parking

Locating the Proposed Development

There are two ways in which the proposed development can be located. Either by entering the local postcode in the box provided, Cell C5, and pressing find postcode button or by using the *"Access Map"* button and scrolling around the map to locate the proposed development by using the hand pointer.

The outcome of this will be the selection of Urban, Town and Fringe or Village as the development location.

Note the *"reset button"* will reset the whole spreadsheet not just the location

Filling in the Development Composition

This is where the potential dwelling types, tenure, habitable rooms (not bedrooms), number of allocated spaces excluding garages), number of dwelling for that dwelling type and number of garages provided for this dwelling type

For most information drop down menus are provided in each cell (dwelling types, tenure, habitable rooms, number of allocated spaces excluding garages) from which the user can select the appropriate answer

A new row should be used for each type of dwelling type, tenure, habitable rooms and allocated parking per dwelling

House Type

Houses will include: Detached, semi detched, terraced houses and town houses
Bungalows (detached and semi detached)
Flats will include: Maisonettes, flats (all levels)

Tenure

On Tenure this includes for owned and shared/rented. We would suggest that any scheme which includes for a mortgage, even part shared through a housing associated should be counted as "owned"
Houses / flats in multiple occupation should be counted as shared/rented

Habitable Rooms

The number of habitable rooms is defined as the same as the general census as below definition

The count of the number of habitable rooms in a household's accommodation does not include bathrooms, toilets, halls or landings, or rooms that can only be used for storage. All other rooms, for example, kitchens, living rooms, bedrooms, utility rooms and studies are counted. If two rooms have been converted into one they are counted as one room. Rooms shared between households, for example a shared kitchen, are not counted.

As a guide the parking report provided the conversion table below:

Number of Habitable Rooms	Number of Bedrooms
2 or less	1
4	2
6	3
8 or more	4

No. of Allocated Spaces

For each dwelling type, or configuration, the user needs to indicate the number of allocated parking spaces this dwelling type will have.

This excludes garages, but includes driveways which are dedicated to an individual property or a dedicated parking space in a designated parking area such as a parking court either attached or remote from the property.

The user can select 0, 1 or 2 allocated parking spaces for that dwelling type (per dwelling) from a drop down menu

Total Number of Properties

The user will need to enter the number of dwellings that they anticipate or that dwelling type, tenure, habitable rooms and no. of allocated parking spaces

Total Number of Garages

The user will need to enter the number of garages that are anticipated for the total number of properties specified in the prvious column

This is important as the spreadsheet discounts the garages (as allocated spaces) by 50% and adds half of the garage number to the unallocated parking provision. The 50% is a conservative estimate for the number of garages actually used for parking a car in and is based on research outlined in the Parking Report

Calculation of Unallocated Parking

The spreadsheet tool uses the information from the previous columns to select the appropriate information from look up tables
These tables are hidden within the spreadsheet to prevent them being altered.

Visit parking is taken as being unallocated parking provision.
It is calculated on the basis of 0.2 spaces per dwelling, where at least 1 allocated space is provided per dwelling.

More information is provided within the Parking Report

Calculation of Allocated Parking

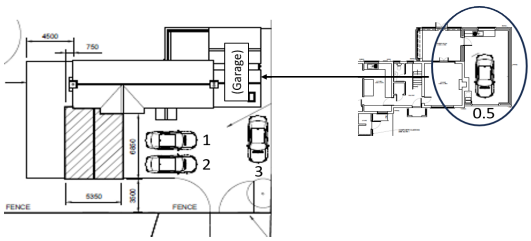
This is based on the total number of dwellings (in that row) multiplied by the number of allocated spaces (excluding garages) per dwelling
To this is added 50% of the number of garages (see unallocated above)

Total Parking Provision

The calculations from the each of the rows is summarised in a table setout below.
These figures should only be treated as the starting point for discussions with the Planning and Highway Authority
The layout and provision of parking should be looked at not only at the overall site level but also within the site to ensure that all areas are provided with sensible parking provision and road / parking layouts are designed to accommodate parking

Total number of properties	1
Total allocated spaces	3.5
Total unallocated spaces	0.0

3 car parking spaces plus 0.5 for existing garage.
(See Site Plan & Diagram ->)



WOKINGHAM BOROUGH COUNCIL

PARKING DEMAND CALCULATION SHEET

Search your development location area by postcode

RG10 9PQ

enter postcode with no spaces (e.g. RG40 1BN as RG401BN) and click on "find postcode"

Find Postcode

Total number of properties	1
Total allocated spaces	3
Total unallocated spaces	1

Select your development location from a map

Access Map

click "access map" and click on where your development is located

Development location

Town and Fringe
