

**TRAVEL PLAN RELATING TO
283 LODDON BRIDGE ROAD, WOODLEY, RG5 4BE**

1. A Travel Plan is already implemented by the existing Practice at 281 Loddon Bridge Road and this will also be applied to 283 Loddon Bridge Road. The existing Travel Plan is intended to promote the most sustainable forms of transport and is applicable to both staff and patients.
2. Travel information is provided to new employees and patients and includes bus timetables, rail timetables, local taxi services and cycle routes. This information is available at reception and is also provided on the Practice website.
3. The number of staff employed at the Practice is relatively small and is recruited from the local area wherever possible. Of the existing staff, 50 percent walk to the Practice, 33 percent travel by public transport or bicycle and only 16 percent travel by car. It is anticipated that these percentages will, at worst, remain the same, although those staff travelling by car will be encouraged to use a more sustainable form of transport.
4. With regard to patients, the Practice operates a software programme which monitors patients travel to appointments. Those arriving by car are encouraged to consider walking, cycling or using public transport and the health benefit of walking and cycling are emphasised.
