COMMENTS:

I fully support the wagon being on the car park in a disused piece of space. Despite this baffling planning, all the group has done is place a wagon on the car park, there is no digging, permanent structure, or noise nuisance to anyone. It's purely a food truck which appears in places up and down the country without issue. The team have ensured they are within the law and hygiene rules and aren't opening at times which would cause an issue.
