COMMENTS:

i have already raised complaint on this issue.we are referring to a three bed semi.detached house . previous work carried ie side extention footings to back extention large drive which exceeded original plans submitted.i have documented these events ie de ep trenches ie left full of water and as there is no boundary fence between his neighbours small children next door could have drowned in it. i dont think he had permission for that.the disruption was immense.now he is not content with that .building work should be carried out effciently with builders causing little or no disruption to neighbours. as there is no kitchen in this house. they cook in back room in hot fat which smell travels up in to our bedrooms and bathroom.we have made many complaints to council a bout this to clair moore.
