Notification No: TL/2000/2454

Parish: Woodley

Proposal: **PROPOSED ERECTION OF A 15M HIGH TELECOMMUNICATIONS MAST WITH THREE POLAR ANTENNA, TWO DISH ANTENNA AND AN EQUIPMENT CABIN,**

Location: **AT WOODLEY TELEPHONE EXCHANGE, WOODLEY GREEN, WOODLEY, READING.**

The Wokingham District Council in pursuance of their powers under Part 24 of the Town and Country (General Permitted Development) (Amendment) Order 1998 **REFUSES** prior approval for the above stated telecommunications equipment, the reasons/conditions for which are specified hereunder.

Reason: The proposed telecommunication equipment would be unacceptably close to residential properties.

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

SITE NOTICE

Proposed development at
WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP
GRID REF: 476750 / 173428 **SITE REF: 91520**

I give notice that **A.P.T.**

on behalf of **ONE 2 ONE PERSONAL COMMUNICATIONS LTD.**

is applying to **WOKINGHAM DISTRICT COUNCIL**

under paragraph A.2(4A) of Part 24 of Schedule 2 to the Town and Country Planning (General Permitted Development) Order 1995 for its determination as to whether the prior approval of the authority will be required to the siting and appearance of

ONE 15-METRE MAST COMPLETE WITH THREE CROSS-POLAR ANTENNAS, TWO 600mm DISH ANTENNAS, ONE RADIO EQUIPMENT HOUSING (3.700 m x 2.700m x 2.9m HIGH) AND DEVELOPMENT ANCILLARY THERETO.

Under Part 24 of the Town and Country Planning (General Permitted Development) Order 1995, **WOKINGHAM DISRICT COUNCIL** is allowed 42 days beginning with the date of application to consider whether prior approval will be required to the siting and appearance of the development proposed and, if so, to give or refuse such approval and to serve that decision upon the applicant.

Members of the public may inspect copies of the application and accompanying plans at

WOKINGHAM DISTRICT COUNCIL, SHUTE END, WOKINGHAM, BERKSHIRE, RG11 1BN.

Individuals and organisations wishing to make representations about the siting and appearance of the proposed development are invited to forward their views in writing no later than **23.10.2000** to

WOKINGHAM DISTRICT COUNCIL, SHUTE END, WOKINGHAM, BERKSHIRE, RG11 1BN.

clearly stating that comments are being forwarded in relation to the proposed development of a ground-based mast at

WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP

GRID REF: 476750 / 173428 **SITE REF: 91520**

SIGNED:

Location: WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP

2D. O.S. SHEET/GRID REFERENCE

Sheet and six figure grid reference of proposed development

Sheet Grid reference 476750 / 173428

3. PURPOSE OF DEVELOPMENT

A radio base station is required at the above site to provide radiotelephone coverage to the surrounding area. It is also required in order to provide contiguous radio cover to my Client's network.

The antennas must be located at the shown height to provide adequate radio coverage to the cell. Any reduction to this height would bring about a corresponding reduction to the radio coverage.

Please see supporting information

4. THE PROPOSED STRUCTURE (Please enclose a site plan and indicate details of cell boundaries, and whether shared mast/tower or free-standing)

i) Type of structure (e.g. tower, mast etc)

MONOPOLE TOWER

overall height 15.00metres

height of existing building (where applicable) metres.

ii) *Equipment housing*
length 3.700 metres.....width 2.700 metres.....height 2.900 metres

iii) Materials (as applicable)
Tower/mast etc:- type of material and external colour
MAST - GALVANISED STEEL

Equipment housing:- type of material and external colour

CABIN – GREY PLASTIC COATED METAL

iv) Location of and distance to nearest residential or commercial property (where applicable):-
.....

5. DISTANCE FROM AIRFIELD OR AERODROME (Please tick as appropriate)

Will the structure be within 3km of an aerodrome or airfield?	Yes	☐	No	☐
Has the Civil Aviation Authority or Secretary of State for Defence (as appropriate) been notified?	Yes	☐	No	☐

Signed (A.P.T.) Date 28/09/2000

On behalf of One 2 One Personal Communications Ltd

MINUTES OF A MEETING OF THE DEVELOPMENT CONTROL COMMITTEE HELD ON WEDNESDAY 8 NOVEMBER 2000 FROM 7.00 PM TO 9.45 PM

Present: Mr KA Malvern (Chairman), Mrs JA Lissaman (Vice-Chairman), Mrs DC Beatty Mr MJ Bryant, Mr SR Conway, Mr TP Dredge, Mr JL Earnshaw, Mr RFN Eke, Fiona Rolls, Mrs MA Long, and Mrs M Robertson.

Also present under Standing Order 39: Mrs DF Carpenter, Mrs ELM Siggery

151. MINUTES

Subject to the addition of the following paragraph in Minute No: 150, the Minutes of the meeting of the Committee held on 18 October 2000 were confirmed as a correct record and signed by the Chairman;

"The Chairman of Committee declared an interest in the following application and left the room for the duration of the item. The Vice-Chairman, Mrs JA Lissaman took the Chair."

152. APOLOGIES FOR ABSENCE

An apology for absence was received from Mr BJS Patman.

160. REPORT ON PETITION ON APPLICATION NUMBER TL/2000/2454 FOR THE ERECTION OF A 15M HIGH TELECOMMUNICATIONS MAST WITH THREE POLAR ANTENNA TWO DISH ANTENNA AND AN EQUIPMENT CABIN AT WOODLEY TELEPHONE

EXCHANGE WOODLEY GREEN, WOODLEY

The Committee considered a report on this petition as set out on pages 1432 to 1433 of the Agenda.

RESOLVED: That the situation be noted.

4.00 REPORT ON PETITION ON APPLICATION NUMBER TL/2000/2454, FOR THE ERECTION OF A 15M HIGH TELECOMMUNITCATIONS MAST WITH THREE POLAR ANTENNA, TWO DISH ANTENNA AND AN EQUIPMENT CABIN, AT WOODLEY TELEPHONE EXCHANGE, WOODLEY GREEN, WOODLEY.

PURPOSE OF REPORT.

4.01 To advise members on the outcome of the telecommunications notification for the erection of a 15m mast with three polar antenna, two dish antennas and an equipment cabin, at the Woodley Telephone exchange, Woodley Green, Woodley.

SUGGESTED ACTION.

4.02 Members are asked to note that the Council informed the applicant that they wished Prior Approval of the design and siting of the mast on the 23 October 2000. The letter gave the applicant 7 days to propose an alternative site. No response was received within the allotted period and the prior approval of the telecommunications notification was refused permission, within the statutory 42day period.

BACKGROUND INFORMATION.

4.03 Members will recall that a petition with 406 signatures was presented to Council on 16 October 2000 By Cllr Dredge. The petition was in the following terms:

"We consider this proposal to be potentially hazardous to the health and well-being of residents (including Children) and workers in the area. We also consider the siting of the mast would affect the appearance of the area (which is next to a Conservation Area) detrimentally and may affect adversely the future re-sale value of homes in the local area."

4.04 A telecommunications application for the erection of a mast up to a height of 15m is permitted development, but subject to a 42 day notification process to the Local Planning Authority. During this period the applicant must display a site notice informing local people of their intention. We as a Council also display a site notice of our own and notify the adjoin properties by letter. Consultees have a 21 day period in which to contact us with their observation on the proposed development.

4.05 The Council must notify the applicant in writing if they require prior approval of the proposed development, setting a time period for any additional information, that may be required. They then must, decided whether to approve or refuse the prior approval. This must all be carried out within the 42 day period, or permission is automatically granted for the proposed development.

Dear Mr Robertson,

PROPOSED ERECTION OF A 15M HIGH TELECOMMUNICATIONS MAST WITH THREE CROSS POLAR ANTENNA, TWO DISH ANTENNA AND AN EQUIPMENT CABIN, AT WOODLEY TELEPHONE EXCHANGE, WOODLEY GREEN, WOODLEY, READING. TELECOMMUNICATION NOTIFICATION :TL/2000/2454.

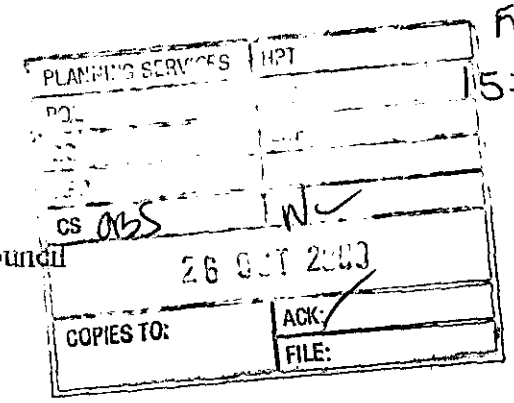
I refer to your notification for a telecommunications 15m mast with three cross polar antenna, two dish antenna plus an equipment cabin, at Woodley Telephone Exchange, Woodley Green, Woodley.

I write to formally advise you that the Local Planning Authority requires Prior Approval of this scheme, in view of the close proximity of the proposed mast to residential properties.

I would be grateful if you would advice me in writing within 7 days of this letter, if you are able to revise the scheme and locate it to an alternative location, which would be significantly further away from any residential properties.

Yours sincerely,

Anna Cronin
Head of Planning and Transportation services.



Flat 2,
157, Buttsfield Road,

Dear Miss Lake

Ref: TL/2000/2454

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

Steve and Laura Chandler

Dear Madam,

Re: Application No TL/2000/2454

I would like to express my strong opposition to the proposed erection of a 15 metre telecommunications mast and equipment cabin at Woodley Telephone exchange . Our property is adjacent to Woodley Telephone Exchange and overlooks it.

The mast would be an eyesore which would adversely affect the whole neighbourhood. The height and character of the construction would be totally inappropriate, next to a residential area.

I also object on the grounds that the proposed mast would be too close to housing. The plans show that it would be very close to our garden fence and therefore unacceptably close to our own house. but I am even more concerned for the people who would be living immediately underneath the mast.

I am also concerned that 15 metres may be an underestimate of the actual height of the erection, when antennae are added on. The mast could be even more obtrusive than the plans indicate.

I understand that there is considerable opposition locally to this proposal. I hope that the council will respond to the wishes of the local people in rejecting this application to erect a telecommunications mast at Woodley Telephone Exchange.

I regret that local people have had so little time to make their views known but would like to express my thanks to the staff at Woodley Town Council for their assistance

Yours sincerely,

Sophie Crowther (Mrs)

Dear Madam

Ref TL/2000/2454

Proposed siting of Mobile Phone Mast at Woodley Telephone Exchange

We are writing to express our objections to the above application for the following reasons:

As parents of 3 young children we are concerned at the possible risk to their health, and that of other children living in the area.

We are also concerned at the detrimental affect this will have on the area in general; such a structure would be totally inappropriate in the area, and may adversely affect house prices in the area

Yours faithfully

M Nicholls F Nicholls

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

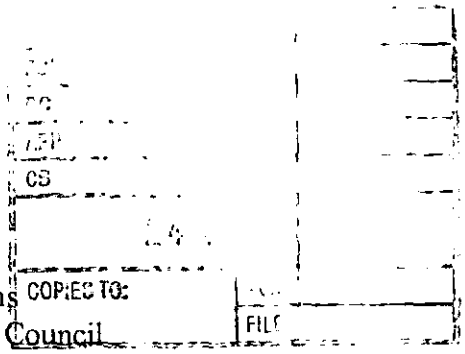
In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,



MRS Y.G. CHUBB

Ref: **TL/2000/254 Proposed siting of one-to-one Mobile Phone Mast At Woodley**

Dear Ms Lake

I wish to vigorously object to the proposed siting of a 15 metre high mast at the Woodley Telephone Exchange by the Telephone company one-to-one on these grounds

- There is considerable evidence to suggest the mast would pose a very real threat to safety and welfare of the residents of the area, staff of the telephone exchange, and Patrons and staff of the Bull & Chequers Pub and those using the Children's play area which is within 60 feet of the proposed Mast site

- one-to-one is already under investigation by the Health & Safety executive for having an unsafe site at Bexley Heath Fire Station, which has been closed down through boycotting by the staff after Telephone Engineers told them that the were not to go within 100 feet of the mast because of the Microwave Radiation.
  This same Information was given to the staff at the Fire Station on the Wokingham Road where one-to-one have sited a mast at the top of the Fire Tower

- The proposed mast would be within 60 feet of residents living off Butts Hill Road and the back gardens in which the children play and the places of employment along Headley Road East, and because of design of the premises, concentrate the Microwave Emissions which would be seriously detrimental to the health of the workers and customers

- The height of the mast may be 15 metres but there would be another 3 metres of Aerials and Microwave Emitters on top, making it higher than any other structure or trees in the area and as such, be an eyesore.
  And it would be sited within a few metres of Woodley Green Conservation Area

- This would have a serious impact on local house prices and a similar application has already been rejected at Duffield Road and that was less populated, so I strongly urge you and the council to reject this application

Yours Sincerely

Anthony luck

Dear Miss Lake

Ref: TL/2000/2454
Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I wish to object very strongly to the proposed siting of a mobile phone mast by One-to-One.

My main concern is the health issues associated with these masts, i.e., headaches, fatigue, increase in blood pressure, possible impairment of learning and short term memory to name a few. I have two teenage children and am obviously concerned for their well-being and I am already on tablets from the doctor for high blood pressure.

They are proposing to site this mast in a built-up area, near a popular pub which has an out door childrens playground which is in regular use during the day and evening during the summer. There is also another childrens playground a few roads away and two parks - Woodford Park and Ashenbury Park nearby. There are a number of industrial companies backing on to the site which would be a hazard to the workers. The Woodley Telephone Exchange is also a training centre and has a number of telegraph poles which when used would mean the men or women at the top would be very close to the mast - has it been looked into as to how safe this would be?

There are a number of blocks of maisonettes closed to the proposed site, therefore the area is more densely populated than normal. I also wonder what effect it would have on house prices to have such a monstrosity towering above any existing buildings or fixtures. It is not something I wish to see everytime I look out of my lounge window.

I should also like to mention that Woodley Green is a conservation area.

I hope, therefore, that objections will be made against this proposal.

Yours sincerely

Miss Irene Dobson

Ref : Nicola Lake.

20th October 2000.

Dear Madam,

Re : Application Number TL/2000/2454.
Woodley Telephone Exchange.

Thank you for your letter of 6th October 2000 and I wish to record my objection to the proposal on the grounds that it would :-

1. Greatly reduce the privacy of bungalows 155a and 155b Butts Hill Road due to the proximity of the location to the boundary fence and the height of the mast which would overlook the back gardens of these bungalows.

2. Reduce the value of the bungalows should the owners wish to sell at some future date.

3. Create noise level which may not be acceptable to occupants of 155a & b.

Suggestion :-
Could not the proposed location be moved further to the East but near to the site access route. Alternatively would land be available to site it between the Telephone Exchange and the rear of the Bull and Chequers car park.

I trust that this proposal will be rejected.

Yours Faithfully

L.T. Waring.

The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

N.L Haseldine (MRS. N. HASELDINE)

P.W Haseldine (MR. P. HASELDINE).

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dear Madam

Re: Application No. TL/2000/2454 – Woodley Telephone Exchange Woodley Green Woodley Reading – Proposed erection of one 15 metre telecommunications mast and equipment cabin

I write with regard to the above application and to set out my objections to the proposed siting of a 15 metre telecommunications mast and equipment cabin.

Considerable evidence suggests such masts pose a serious threat to the health of local residents/employees:-

- The positioning of the mast adjoins our business premises and concern is therefore for the staff employed
- It is in the vicinity of a number of children's play areas
- It is within a short distance of Woodley Green Conservation area.
- This is a high-density residential area and the mast is considerably higher than other buildings in the surrounding area.

Yours faithfully
John L. Hicks Timber and Builders Merchants

T 2000/2454

Dear Miss Lake.

I wish to voice my opinion on the proposed siting of Mobile Phone Mast at Woodley Telephone Exchange.

My objections are the radiation effect of these masts, and the effect it will have on young and old.

My wife and I use the Bull and Chequers Public House, and take our three grandchildren there for meals on Saturdays they use the play area which is very close to where the mast will be situated.

Also what an eyesore for such a lovely pleasant area.

I urge you to reject the application.

Dear Miss Lake

Ref. TL/200012454 Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

We are writing to object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:-

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodlev is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools, Woodley Church of England School and Waingels Copse Secondary School.

- Also, next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT Training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses, in particular, the Bull & Chequers if it's patrons decide to socialise elsewhere. The Bull & Chequers also has a children's play area which would lie within a few yards of the mast.

- There are a number of children's play areas including Enstone Road and Ashenburv Park within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. The proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast, following the adverse press this subjecthas had.

Dr Kjell Hansson Mild in Sweden has carried out a study on 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a threat to all those who live and work in this area and will have a detrimental impact on the local environment.

We urge you to reject this application.

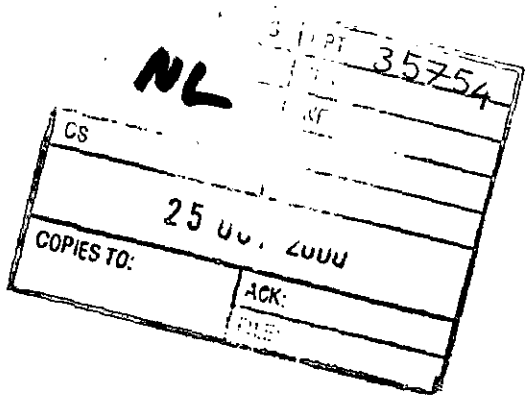
copy to IJ



19 October, 2000

Dear Nicola,

Application No. TL/2000/2454

Referring to our telephone conversation on Monday - thank you for taking the trouble to drop a copy of this plan through the letter box on your way home. I expect you got my message that the original copy arrived with a batch of other plans on Tuesday morning in the normal post!

I understand from Councillor Dredge that the petition was handed to the WDC council meeting on Monday evening, and subsequently passed to you. We did in fact have three members of the public at the Town Forum (before our council meeting) on Tuesday. One of them, Mr. Luck, seemed to be very informed on the subject of mobile phones and telecommunications masts and he had a few disturbing stories to tell on the subject.

In view of the timescale, I asked members of the Plans Committee to stay at the end of the meeting so that we could have a look at the plan and get some preliminary comments off to you without delay. As you will see, these are on the attached sheet. Our next Plans Committee meeting is scheduled for Tuesday 7th November which, I believe, will be just within the 42 days, so I will contact you again after that. As you know, we notify 'neighbours' and give them the opportunity to attend and speak at our meetings so there may be some further comments to add.

Members were very disappointed that we had not received the plan earlier, particularly as they were given to understand that a copy was in the library last Wednesday and they subsequently noticed that the date on the letter from A.P.T. was 27th September.

cont.../

Town Clerk
Deborah Mander BA MA

/...cont

I believe that some town councillors had received phone calls about the application and had to plead ignorance! As a result of this, they have asked whether it would be possible for the Town Council to be included in the regular courier deliveries, along with those made to Woodley district councillors and the library. It would be helpful if you could look into this possibility.

Again, many thanks for your help.

Yours sincerely,

Ann Keenan (Mrs.)
Community and Members Services Officer

WOODLEY TOWN COUNCIL

CS

COMMENTS FROM A SPECIALLY CONVENED INFORMAL MEETING OF MEMBERS OF THE PLANS COMMITTEE MEETING ON TUESDAY, 17th OCTOBER 2000.

COPIES TO: | ACK:

Application No. TL/2000/2454

Members recommended that the application be refused based on the following concerns:

- the inconclusive evidence about the health & safety risks of telecommunications masts
- it would be unacceptably close to residential properties, but more particularly to 155A and 155B Butts Hill Road
- its close proximity to play area and outside seating area of the Bull & Chequers PH
- its close proximity to an employment area – particular reference was made to the dangers for telephone engineers using the top of nearby poles for training purposes as they would be nearer to the radiation
- it was in the environs of a conservation area
- the grave concerns expressed by a large number of residents and patrons of the Bull & Chequers PH (NOTE: It was understood that of the 512 signature petition handed to WDC, a comparatively small percentage were patrons of the public house)
- the unacceptable height of the mast (15m) which, with peripherals, would appear to add a further 4m. **
- the plan and elevations were misleading in terms of trees etc.

** Members particularly asked for clarification on the exact height of the mast, to include the antennae, as this was not evident from the plan.

PETITION

We, the undersigned, object to the proposal by the telecommunications company One-to-One to site a 15 metre high Mobile Phone Mast at the Woodley Telephone Exchange. (Case No. TL/2000/2454)

We consider this proposal to be potentially hazardous to the health and well-being of residents (including children) and workers in the area. We also consider the siting of the mast would affect the appearance of the area (which is next to a Conservation Area) detrimentally and may affect adversely the future re-sale value of homes in the local area.

PETITION

We, the undersigned, object to the proposal by the telecommunications company One-to-One to site a 15 metre high Mobile Phone Mast at the Woodley Telephone Exchange. (Case No. TL/2000/2454)

We consider this proposal to be potentially hazardous to the health and well-being of residents (including children) and workers in the area. We also consider the siting of the mast would affect the appearance of the area (which is next to a Conservation Area) detrimentally and may affect adversely the future re-sale value of homes in the local area.

Dear Madam,

We wish to object to the erection of a Telecommunication Mast which is to be sited on the Woodley Telephone Exchange Site. A few years ago these people applied to erect a mast on the John Hicks DIY site here in Woodley Green, we all opposed it under health and being too close to residential homes etc, and they were turned down, thank God. So why are they trying again as nothing has changed as it will still be too close to residents in the whole area.

May we suggest that they apply

to have one sited on the very green area of Denton Pastures instead of in the middle of a residential area.

Sorry we are late with our objection, but we only returned from holiday on Saturday.

Yours Sincerely

Mr + Mrs D.R. Keen

Dear Miss Lake

Ref: TL/2000/2454

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

P J Fisher

17th October 2000

IN OPPOSITION.

Dear Miss Lake

REF TL/2000/2454

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunictions company One-to-One.

Position - BT have a large area surrounded by industrial buildings on two sides and yet this mast and building have been placed on the residential side and very near to peoples homes. It cannot be necessary to place this mast so near to Woodley Green which is a conservation area.

Distance - The distance from 155a is very small and yet there appears to be space wasted to the East.

Noise - The building with equipment will obviously produce noise and will be within hearing distance of our home.

Value - On Estate Agents advice this Mast and Building will de-value our premises.

Health - We are concerned about the health risks relating to the Mast and although we understand this has not been proven we are deeply concerned.

Eyesore - This Mast and Building are going to be an absolutely hideous sight every time we glance out of our patio window. There is no screen between us and the new building.

Suggestions - a) Can the portable buildings be moved and the Mast Building take their place.

b) If the Mast and Building is situated further to the East where there is empty space it would be out of our sight line.

Personal - Our bungalow was bought as a place of peace and quiet and our garden is a great joy to us. With this monstrosity now being situated so close, all will be spoilt. Shall we be able to open our patio door? If so what shall we hear? We do not really want to sit inside or out and look at a grey steel building.

Environment - During our time here we have encouraged wild life. We now have hedgehogs, squirrels, woodpeckers and a wide range of birds visit us including a flock of red wings. We are totally opposed to anything that makes our area less green.

Yours faithfully

J. K Price (Mrs)

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

J. K Price (Mrs

The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Yours sincerely,

G. Perkins. (Ms)

Dear Nicola Lake.

Re planning appn. TL/2000/2454
COPIES TO
at Woodley Telephone Exchange

Proposed erection of one 15 metre telecomm's mast etc

I refer to your letter of 6.10.2000.

I strongly object to above proposal on the following grounds:-

1. The proposed mast is diagonally opposite my residence & not far away.
2. Until such masts are proved conclusively to be totally safe for nearby residents, especially children, they should not be allowed.
3. The height will be visually obtusive & totally out of keeping with the area, being approximately twice the height of nearby buildings & therefore causing visual pollution - The mast

Dear Miss Lake

Ref: TL/2000/2454

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

The proposal to site this mast poses a serious threat to all those who live and work in this area and will have a detrimental impact on the local environment.

I strongly urge you to reject this application.

Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

I am writing to strongly object to the proposed siting of a 15 metre high mobile phone mast by the telecommunications company One-to-One.

The reasons for my objections are as follows:

- There is considerable evidence to suggest such masts pose a serious threat to the health of local residents. This part of North Woodley is a dense residential area with many young children living in the neighbourhood. Within a short distance are Willowbank Infants & Junior Schools and Waingels Copse Secondary School.

- Similarly next door to the proposed site are a number of places of employment. These include all the units on Headley Road Industrial Estate which backs onto Woodley Telephone Exchange, the Exchange itself which also includes a BT training Centre, Hicks Builders Yard and the Bull & Chequers Public House. The mast would pose serious health dangers to the workers employed and to the customers of these businesses. The mast if built could affect trade to these businesses particularly the Bull & Chequers if its patrons decide to socialise elsewhere. The Bull & Chequers also has a childrens play area which would lie within a few yards of the mast.

- In the area also are a number of children's play areas including Enstone Road and Ashenbury Park both within a short distance of the mast.

- The height of the mast at 15 metres would be substantially higher than any other building or fixture in the area and as such would be an eyesore in such a pleasant part of Woodley. Indeed the proposed site is only a few yards from the Woodley Green Conservation Area.

- If the mast is built it is likely to have a detrimental impact on local house prices as potential buyers in many cases will not wish to buy into the area close to the mast.

Dr Kjell Hansson Mild in Sweden studied 11,000 mobile telephone users and found symptoms such as fatigue, headaches and burning sensations on the skin.

In June 1998 the Lancet reported that radiation from mobiles causes an increase of blood pressure. Blood pressure rose each time by between 5-10mm Hg, probably from a constrictive effect on blood vessels.

An American study found that learning and short term memory were impaired after just 45 minutes exposure to radiation from mobile phones.

Dear Ms Lake

APPLICATION #TL/2000/2454

I wish to register my objection to the erection of a Telecommunications Mast at Woodley Green.

I have worked hard over many years to create a beautiful outlook at the rear of my home in Church Road and it now seems as though this is about to be destroyed by a 45-feet monstrosity towering over the immediate neighbourhood.

Furthermore, there has been much in the media about the potential health hazards involving the use of cellular telephones. How much greater is the risk to health for those in the immediate vicinity from the vastly higher output of microwave radiation that will be emitted from an operational mast?

Such structures should be kept away from residential areas in order to minimise the risk to public health.

Yours sincerely

J M Johnson.

Dear Nicola Lake

Re: Application number TL/2000/2454

Further to John Mitchell's letter advising us of the proposed erection of a 15 metre telecommunications mast and equipment cabin.

We wholeheartedly object to this proposal on the following grounds:

1) It would be an eyesore of the highest magnitude
2) It would bring down the price of houses with a view of this eyesore
3) There must be less conspicuous places to locate this eyesore
4) We do not want it near our property

I trust that this objection will accompany the many others that you will receive.

Yours sincerely

Simon & Julia Jenner

Dear Madam,

Ref: TL/2000/2454 - Proposed Siting of Mobile Phone Mast at Woodley Telephone Exchange

It has come to our attention that a planning application has been lodged to erect a mobile phone mast by the telecommunications company One-To-One at Woodley Green. This application, incidentally, is a very small notice pinned to a telephone pole outside a private bungalow. The application, therefore, would be assumed to be a planning application for that dwelling if closer inspection had not taken place.

I must object most strongly and wish this objection to be recorded when this application is before your committee.

I feel that apart from the obvious that it will be an eye-sore, I am very concerned with the adverse publicity that mobile phones are receiving regarding the health issues. We are constantly being informed that there is evidence to suggest that mobile phones are a danger to health. The site of this proposed mast is right in the middle of both an industrial area and a housing development which, to my mind, makes it an entirely unsuitable place to erect such a mast.

I understand a petition is being instigated and I do ask that you take the objections of the local people on board. This type of telecommunication could surely be better sited in a field far away from local inhabitance.

Yours faithfully,

J Walkinshaw

MEMORANDUM

From: Joanne Ellis, Environmental Health

My Ref: JPE/JS/20002813

To: Nicola Lake, Planning

Your Ref: TL/2000/5454

Date: 12 October 2000

PROPOSED ERECTION OF ONE 15 METRE TELECOMMUNICATION MAST AND EQUIPMENT CABIN

LOCATION: WOODLEY TELEPHONE EXCHANGE WOODLEY GREEN WOODLEY

I have evaluated the above proposals and have no objections to planning consent but have the following comments to make in relation to this proposal:

There have been questions raised as to the possibility of adverse health effects from electromagnetic radiation from telecommunication base stations and their positioning in relation to residential development and, in particular schools.

The National Radiological Protection Board (NRPB) was established by the Radiological Protection Act 1970 and is responsible for conducting research and providing advice and services for protection against ionising and non-ionising radiation's in the U.K. They are continually reviewing the vast body of world-wide research on the subject.

The NRPB's current advice is that there is no proven human health risks from these installations. This position is confirmed by the Chartered Institute of Environmental Health and pressure groups such as Powerwatch network . There are however countries and areas of the world where precautionary measures have been adopted , e.g. New Zealand Ministry of Education has issued a policy statement preventing cellular phone antennas from being sited at state schools in the future.

Further research is currently being undertaken into possible health implications although to date no definitive statement can be made.

The NRPB have set up an Advisory Group to look into this matter. This Group has concluded, in reference to buffer zones for sensitive developments, that there is neither a clear basis from which to derive a meaningful assessment of risk , nor is there any indication of how putative risk might vary with exposure. Thus there is no scientific justification for seeking to reduce exposure in these situations and that a decision to do so must be based on social and economic rather than scientific grounds.

The Chartered Institute of Environmental Health's current policy is as follows :

"The CIEH with regard to overhead and buried high voltage power lines, electricity sub-stations, wind generators, microwave and radio transmitters, mobile telephone base stations and other similar installations emitting electro magnetic radiation (EMR) in close proximity to dwellings considers :

a) That the effect on human health based on current scientific evidence is insignificant and not proven.
b) That there is no convincing national or international scientific research linking Electromagnetic Radiation and deterioration in human health.
c) That a precautionary approach to restricting building or access near such installations (apart from physical safety barriers) cannot be sustained on health grounds alone and if adopted must be based on access, amenity, and public acceptability considerations.
d) That local authorities should adopt a policy on how to address questions from the public on Electromagnetic radiation from such sources."

Please contact me if you require further information.

Dear Sir/Madam

Application Number: TL/2000/2454

Site Address: Woodley Telephone Exchange , Woodley Green, Woodley, Reading.

Proposal: Proposed erection of one 15 metre telecommunications mast and equipment cabin

We have been consulted by One 2 One Ltd of their intention to carry out the above mentioned telecommunications development.

The application can be viewed at this office from 8.30am to 5.00pm Monday to Thursday and 8.30am to 4.00 Friday or at Woodley Library, Headley Road, Woodley from 9.30am to 7.00pm Monday, Thursday and Friday, 9.30am to 5.00pm Tuesdays and 9.30am to 1.00pm Saturdays. The library is closed all day on Wednesdays. If you are intending to view the details at Woodley Library please allow 3 days from the date of receipt of this letter for the plans to be delivered.

If you have any comments regarding this proposal they must be made in writing and addressed to the case office, **Nicola Lake**, quoting application number **TL/2000/2454** & should you have any queries please contact the case officer on **(0118) 974 6481**.

All comments must be received within 21 days of the date of this letter and will be open to public view.

Yours faithfully,

John Mitchell

Development Control Manager

LICENCE NOTICE

Dear Sir

NOTICE OF PERMITTED DEVELOPMENT PROPOSED BY ONE 2 ONE PERSONAL COMMUNICATIONS LTD. FOR THE ERECTION OF ONE 15-METRE MONOPOLE COMPLETE WITH THREE CROSS POLAR ANTENNAS, TWO DISH ANTENNAS, ONE RADIO EQUIPMENT HOUSING AND DEVELOPMENT ANCILLARY THERETO AT WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP.

One 2 One Personal Communications Ltd. is licensed to provide a Communications Network within the United Kingdom. In order to facilitate this, the Company has been conferred the status of Public Telecommunications Code System Operator. Cellular Radio systems are designated as Public Telecommunication Systems under Section 9 of the Telecommunications Act 1984.

As a condition of their operating licence, One 2 One Personal Communications Ltd. is obliged to advise you of their intention to carry out the development specified above and as shown on the attached plan (No. 00072/91520/760704/01 revision A & /02 revision A). The proposal constitutes permitted development under Class A Part 24 of Schedule 2 of the Town and Country Planning (General Permitted Development) Order 1995 & the Town and Country Planning (Amendment) Order 1999. Accordingly we hereby provide you with 42 days Notice of our intention to carry out the development as described above.

Yours faithfully

John-Paul Robertson

Dear Sir

APPLICATION UNDER CONDITION A.2 (4A) OF PART 24 OF SCHEDULE 2 OF THE TOWN AND COUNTRY PLANNING (GENERAL PERMITTED DEVELOPMENT) ORDER 1995 & THE TOWN AND COUNTRY PLANNING (AMENDMENT) ORDER 1999 FOR PERMITTED DEVELOPMENT PROPOSED BY ONE 2 ONE PERSONAL COMMUNICATIONS LTD. AT WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP.

One 2 One Personal Communications Ltd. is licensed to provide a Communications Network within the United Kingdom. In order to facilitate this the Company has been conferred the status of Public Telecommunications Code System Operator. Cellular Radio Systems are designated as Public Telecommunication Systems under Section 9 of the Telecommunication Act 1984.

We are writing on behalf of One 2 One Personal Communications Ltd. to make application under A.2 (4A) of the above order. We attach a plan (No. 00072/91520/760704/01 revision A & /02 revision A) showing the proposed installation together with a cheque for £35.00 (thirty-five pounds). Also attached is a copy of the site notice displayed in accordance with sub-paragraph (ii) of the above legislation and a plan indicating where it is displayed. Please note this application only relates to those components of the installation listed under (4A)(a).

Should you wish to discuss the proposals in greater detail please do not hesitate to contact the undersigned.

Yours faithfully

Dear Sir

Re: PERMITTED DEVELOPMENT PROPOSED BY ONE 2 ONE PERSONAL COMMUNICATIONS LTD. AT WOODLEY TELEPHONE EXCHANGE, CHURCH ROAD, WOODLEY GREEN, WOODLEY, READING, BERKSHIRE, RG5 4QP.

Please find enclosed a Notice of Permitted Development for the installation of a radio base station at the above location. My client, One 2 One Personal Communications Ltd is proposing to erect one 15-metre reduced equipment mast complete with three cross polar antennas, two dish antennas and one radio equipment housing at the above location.

Our client One 2 One Personal Communications Ltd. (One2One) is a Public Telecommunications Code System Operator licensed by the Department of Trade and Industry to provide a personal communications network to the whole of the United Kingdom. In order to achieve this, a planned network of interacting cells of varying sizes is required and is essential to ensure a high standard of service. The mobile telephone is a tool now used in every arena of daily life. In light of the growth of telecommunications, sites need to be established to provide radio signal coverage to residential and business settings, for leisure and industry, and to metropolitan and rural locations. This means the search areas are often quite small because the installations are serving specific areas of the community.

Ideally the radio base station should be located at the cell nominal but due to many reasons this is often not achievable. Therefore our clients allow a degree of tolerance in regard to the area to be surveyed and this is known as the search area. However, the distance it can be located from the cell centre is limited by the need to achieve an efficient distribution of cells avoiding the signals between cells utilising the same frequency.

Woodley Telephone Exchange has been designated as a site where a radio base station is required in order to provide radio telephone coverage to Woodley Green and the surrounding area. It is also required to provide a contiguous service to my clients' network. Our brief as consultants to One-2-One is to survey the designated area to locate a suitable Radio Base Station site. When looking for sites there are a number of important considerations that are taken into account.

...Cont'd...

These include:

1. **The radio implication of the site:** Radio signals are transmitted through the network by using fixed links at such frequencies that necessitate an uninterrupted line of sight. To achieve this the installation must reach a sufficient height above surrounding buildings and trees.

2. **Land availability:** The site is dependent upon landowners' willingness to see their property used for this purpose.

3. **Planning:** Every effort is made to ensure that the best site is chosen in relation to its planning characteristics, for instance, the effect on the amenity of the adjoining property, the availability of effective screening etc. However, this is clearly constrained by the technical parameters of the system and the land availability previously mentioned.

The intended coverage area is Woodley Green and the surrounding area. The cell consists predominately of residential properties and some industrial developments. The main London to Reading railway line runs through the northern tip of the cell. Land heights vary from 35m AMSL to 50m AMSL. No suitable rooftop options were found within the required area, therefore a Greenfield option was pursued.

In order to provide coverage to the intended area, and based on technical and planning criteria, the proposed site is favoured. The site at Woodley Telephone Exchange is located in a position that will provide good radio coverage to the target area. The site provider is willing to have a radio base station on the land and the site has an established access route. The Existing large trees on the site as well as the large commercial buildings to the East and South of the site will provide excellent screening to the lower parts of the mast and compound. The 15-metre mast will be of a slim-line design and therefore the proposed development, with this mast and the large amount of screening provided will have a minimal visual impact upon the surrounding area. The mast can be also be painted to any British Standard colour if required to further blend the development with the immediate vicinity. The height of the mast is required to provide coverage to the intended area and any reduction in this height will have a corresponding reduction in radio signal coverage.

I trust that this information will be helpful in reaching decision on this application but if more information or a site visit is required please do not hesitate to contact me.

Yours faithfully

John-Paul Robertson
