COMMENTS:

Old Bath Road isn't designed to support the proposed number of lorry movements. Deliveries to the business next door cause hold ups and danger to pedestrians already. The pavements are too narrow and used by children going and from to school. Four different buses run along the Old Bath Road. The country park and its wildlife would be in danger if there were a fuel spillage. It's in a flood area. We don't need this fuel distribution centre in Charvil.
