COMMENTS:

My parents live on old acres lane, next to the site. With the nature reserve so close by, I am worried about any potential leakage into the surrounding lakes and rivers and the detrimental impact this would have to the wildlife. In addition I am very concerned about the number of HGVs that will turning into and out of the site. Especially with the frequent obstructions already caused by the HGV's making their tyre deliveries to the neighbouring business. This is a road traffic accident waiting to happen. The proposed use of this site as a fuel storage depot is inappropriate for the country park.
