COMMENTS:

We moved into a bungalow that is adjacent to the land with the application. We moved to be able to enjoy having a garden for the first time and no housing estates and blocks of flats overlooking us. We finally have a quiet country location. The wildlife around is important and shouldn't be disturbed. Having more house will put a substantial strain on the local area where The infrastructure is already at bursting point. The roads will be jammed, the current shops, schools and doctors surgery cannot cope with anymore.

As I sit here typing the birds are chirping outside my window with the sun shining in what would be an area that would be blocked and obscured. Living in an overcrowded area will not be conducive to my mental health.

I am therefore officially objecting to this application.
