COMMENTS:

if you lived here you would know how overcrowded this area is and they have put in for over 2800 houses just down the road at lower Early. You are making this area a nightmare to live in. The water board can't cope with what we have now. They dig up The Hyde End Road weekly to repair the pipes. We have power cuts regularly and the traffic is terrible. You promise the earth but don't deliver! You are meant to make things better but you are building on good growing fertile land which supports many types of wildlife. You say you care but this is a lie it's all about money and power. If you really cared about our environment you would stop this constant building as it's not for locals it's for the overcrowded towns of Slough, Southall etc as these are now the people living in the new builds locally. We just about get a bus an hour and this is your idea of getting us out of our cars, what a joke. This so called scheme is not for us locals as Arborfield, Wokingham, Shinfield and now Spencers Wood. It's all about greed and will not benefit anyone in this area, so stop trying to fool us we say no and no means NO!
