I am writing regarding planning application 260577 (Range Road) to formally request your support in raising an objection on my behalf.

Having reviewed the proposal, I have significant concerns that it conflicts with key planning policies and will result in material harm. In particular:

- The site is located within open countryside and outside the defined settlement boundary, contrary to Core Strategy Policies CP3 and CP11
- Range Road is a narrow rural lane with no pavements, limited passing places and poor visibility, and is not suitable for the increased and type of traffic associated with this development.
- Safe pedestrian access is lacking, meaning the site is not a genuinely sustainable location in practical terms
- There are existing drainage and surface water concerns, which risk being exacerbated
- The proposal would erode the rural character and openness of the area

Taken together, these issues represent clear and demonstrable harm.

I must also emphasise that I have very serious concerns regarding my personal safety in relation to this matter. As a result, I am not in a position to submit an objection directly via the planning portal, as this would make my name and address publicly accessible.

Given these circumstances, I am asking you to:

- Formally raise these concerns within the planning process on my behalf
- Support and, if appropriate, submit an objection reflecting these issues
- Consider calling the application to committee if it is not already scheduled, given the level of local concern and potential impact

It is extremely important to me that my identity and address are not disclosed to the applicant or published publicly.

I would appreciate confirmation that you are able to support in this way, and please let me know if you require any further information.

Thank you in advance for your assistance.
