COMMENTS:

With Addington school not far away in Woodley providing the same care for children with learning requirements and autism, why is it necessary to build a SEND unit on school playing fields currently used as a hard surface area for physical activities? Where will these physical activities now be held if the unit is built? If the proposal to then to move said hard surface area adjacent and west south west to the SEND area, this will then mean that adults and children will be able to overlook the house gardens due to the higher ground, thus reducing privacy considerably on a daily increased rate.

This is already happening with increased frequency with unsupervised school children climbing the trees on a daily basis.
