Dear Nabeel

Having made a site visit to your property 22 Edgecumbe Park Drive, Crowthorne I would advise the following be applied for.

1. The removal of the Pine in G3 on the sketch plan due to its poor form, no single leader and being swamped in between two other trees. The Pine adds no amenity or wildlife value and is unlikely to ever grow into a good specimen.
2. The removal of the large Pine to the South of T2 on the sketch plan due to its sparse crown and apparent decline. This is a large mature tree with a lot of die back and sparse foliage at my time of visit and I would advise removal before it is completely dead as the branches become brittle when the tree dies completely.

Photos of the trees are provided below for visual aid.

Photo of Pine in G3 with co-dominant leaders

Photo of large Pine to the South of T2 showing significant dieback and sparse crown compared to other specimens.

Regards

Warren Aspey (ND Arb)
