COMMENTS:

I object. This is an AWE evacuation zone and not safe to build in. The number of new houses built and planning to be built in this area is overwhelming the local infrastructure. The local roads are already overloaded and not able to deal with peak morning and evening traffic. It won't be possible to extend the infrastructure quickly enough and the layout of the existing road system won't allow it. If the new school is built it inevitably attracts children from outside of the local area making the overload even worse. There are many more suitable places for this development and profit is clearly being placed over common sense.
