COMMENTS:

I wish to object to the proposal for 136 new homes in this area. The community is already under significant pressure from existing development, with over 1,000 homes already built or approved nearby. Adding a further 136 properties would place even greater strain on an area that is already suffering from overpopulation and insufficient infrastructure.

Local roads are already congested, particularly at peak times, and the current transport network is not equipped to handle the increase in traffic that this development would bring. Public services such as GP surgeries, schools, dentists, and other healthcare facilities are already stretched and struggling to meet demand. Residents are experiencing the effects of growth without the necessary improvements to support it.

There are also concerns regarding drainage, parking, and the overall loss of green space and community character. Continuous housing expansion without proper investment in infrastructure is unsustainable and unfair on both current and future residents.

Until meaningful upgrades are made to roads, transport links, healthcare provision, school places, and essential services, this application should be refused.
