

**REVISED TRAVEL PLAN RELATING TO
283 LODDON BRIDGE ROAD, WOODLEY RG5 4BE**

The Travel Plan will monitor the levels of sustainable travel to the new surgeries by means of a twice yearly, two-day survey of patients' mode of travel to the Practice. The aim of the Travel Plan will be to increase the level of sustainable travel. To this end:

- The Travel Plan will be implemented from the date that the additional surgeries become operational;
- Patients and staff will be provided with information promoting walking, cycling, public transport and other sustainable travel options;
- The Practice Management will seek to monitor and improve current levels of sustainable travel by encouraging staff to consider alternatives to single occupancy car journeys where feasible.

The Travel Plan will be reviewed and updated following the results of the mode of travel survey and the parking stress survey. The results of the survey will be submitted to the Planning Authority for analysis.
