COMMENTS:

I keep my horse at Hatch Farm stables. It is home to around 30 x horses and is part of a big footpath and bridleway network. We would all be devastated to loose such unspoilt green spaces and peaceful homes for our horses. There is very little land for horses left now in the area as you keep building on it. There is so much wildlife at the farm which by building more homes would destroy the ecosystems we have and decrease already dwindling numbers of bats, dormice, birds of

prey, foxes and deer to name but a few. It also is very wet land due to natural springs underground, so building on this would only create more flooding and pressure on already failing drainage. We live in Winnersh and this increased building would only make traffic even worse and it's really bad at the moment as it is!!!
