COMMENTS:

No to this absurd proposal. The local roads and public services in Lower Earley and surrounding areas are already under extreme pressure. Traffic jams, lack of medical appointments and services are causing incalculable problems and distress to residents and the addition of thousands more houses in the locality would be utmost folly.

Furthermore, the loss of even more green space and countryside would be disastrous. There is more than sufficient underdeveloped and wasteful urban brown sites that are close to existing public services that should be improved a better used for residential and commercial development. Stop this crazy and unwanted proposal!
