COMMENTS:

I fully support the plans for The Horns as it promises a number of benefits to the local community. The Horns is an important community asset for both for residents and visitors from the local area. It has a role as a social hub for all ages and the plans are totally in keeping with the style and character of the building and fit for its purpose as a busy public house. There are no concerns around parking as the plans include a substantial number of off road parking spaces. It creates employment opportunities for local people and will support local businesses such as breweries and meat suppliers.
