COMMENTS:

We are already inundated with new houses being built on farmland accessed by country lanes and poor access onto junctions ie Old Wokingham Road at Easthampstead Road and Waterloo Road. The current roads are too narrow and extremely badly maintained. Where are the facilities for these houses and bus routes to take the huge extra numbers of dwellers?

These thousands of extra houses may well earn the Council pots of money but they must be supported by the redesign of roads to accommodate them as well as schools, doctors shops and transport. The Southern Relief Road has nothing to add to the movement of traffic in the direction of Crowthorne and is making the journey from Crowthorne to Wokingham an ever increasing journey with pathetic bus links. Please consider infrastructure BEFORE housing construction.
