COMMENTS:

Whilst understanding there is a need for more affordable housing in the area, my principle concern is the addition of of 75 homes who will it is reasonable to assume will have at least 1 vehicle per home as a minimum. With second cars, it is feasible to presume there will be an additional 100 + car movements in rush hour on an already busy road. Let alone if this goes ahead along with Speedy Fuels, its going to be very busy on the local roads. I therefore object to these plans.
