COMMENTS:

This application has not been notified to local residents. We live 3 houses away and had no idea of this proposal until we spotted the portakabins (which are already in place) and thought to check the planning situation. The portakabins are industrial and out of keeping with the residential feel of the area. There are far more aesthetically sympathetic designs available yet the vets have chosen large grey containers that resemble shipping containers. The visual impact is awful to those of us overlooking the car park area at the back including for those residents of Pearmans Glade. Whilst we are happy to support our small local businesses expand please can some thought go into the choice of portakabin bearing in mind the length of time they are proposed to be in situ. Alternatively please consider temporary screening alongside the Pearmans Glade boundary. The screening along Pearmans Glade has been decimated following the removal of trees with TPOs alongside Seneca (with planning permission) supposedly as a result of subsidence.
