COMMENTS:

I formally object to this plan. This is not in Arborfield's the local plan. I do not support housing on any of the green spaces. Arborfield has already had its share of 3,500 houses as one of the four strategic development locations in Wokingham Borough changing it from a semi-rural to an urban concrete jungle. All the SDLs are in the South of the Borough. This has put a lot of strain on the local infrastructure, and the quality of life for the local residents, to say the least. Commute times have significantly increased due to the congestion on local roads during peak hours, any new development, large or small, will add more traffic to already busy roads. Please reject this application.
