COMMENTS:
Greetings!

I am writing to strongly object to the planning application 250959 for a goods vehicle operator's license. I believe that this application, if approved, will have a significant negative impact on the environment and the safety of our community.

The proposed route for these heavy goods vehicles is along the Old Bath Road, which is a narrow and already congested road. The increase in traffic, particularly large trucks and trailers, will inevitably lead to increased noise and air pollution, both of which pose a significant threat to the health of residents.

Furthermore, the proximity of the proposed route to the lake raises serious concerns about the potential for environmental damage. The risk of fuel spills or other pollutants contaminating the river's is simply too great.

In addition to the environmental concerns, I am also worried about the impact this will have on road safety. The Old Bath Road is not suitable for heavy goods vehicles, and the increased traffic will increase the risk of accidents.

I urge you to reject this application on the grounds of environmental protection and public safety.

Regards,

Vivek Tomar
